To Our Customers

We wish our customers to be satisfied. We will do all we can to make them satisfied. We regard you as our friends. Your good will means much to us for then you will tell your friends and neighbors. Each year we are trying to give first class stock at a price that will create a trust and confidence in us that is the basis of all trade.

OUR LOCATION

Please look at the back of the catalogue for the map showing you just where we are and how easy it is for you to drive to our place. We are nearly at the corner of three states. Two U. S. highways go through our town, U.S. 27 and U.S. 20. See how conveniently we are located.

VISIT US

Our latch string is out. Come when you please. Stay as long as you like. Go where you please. See the plants in bloom. Ask us questions about how to plant, how to take care of and how to grow. Our years of experience is yours for the asking. You may avoid mistakes by availing yourselves of our experience.

LANDSCAPE WORK

We have experienced landscape men. They will give you any information they have free of charge. When you are ready to talk planting or the resetting of your present planting just get in touch with us. It may save you discouragement and money.

If you desire a plan so that you may do part of the work this season and part next and still be sure that it will all be of one unity, our landscape department will make it for you. The charge for this plan for small residences is \$5.00. For more elaborate plans the cost is more. But this fee is deducted from your bill when you buy your shrubbery of us.

GUARANTEE

We guarantee that the stock furnished you will be of a size and quality as listed in this catalogue or we will replace the stock for you without cost or refund the purchase price. But in case of error on our part as to stock being true to name or of size purchased it is agreed that we will be liable for no more than the purchase price.

TERMS

Our terms are cash when order is received unless other arrangements are made. Please remit by registered letter or by Post Office order or by draft. For references we give the only bank in our town. The Angola State Bank or Dunn or Bradstreets to be found in almost any Bank.

Special Money Saving Offer—Save Dollars, Order Early

PREMIUMS FOR EARLY ORDERS

Did you ever stop to think that there are only a few weeks of the spring in which all planting has to be done? And that during that time everybody is in a hurry to have their orders filled. To avoid this rush and be able to get your orders to you without delay we are offering a discount for those who order early. We save money because we can fill your orders with our old experienced men; we can do it with less expense and less chance of error because we use these experienced men. *So for every order sent in before April 1 cash with order we will let you select free of charge \$1.00 worth for every \$5.00 you order. Just think, if you order \$25.00 worth you get \$5.00 free. On \$100.00 orders you get \$25.00 free.*

No Premiums given after date given and none on "Specials".

NOTICE

“Plant Trees as Permanent Memorials to George Washington”

Just as this catalogue was ready for the mail a bulletin from the Indiana George Washington Bicentenary Commission with the above heading comes to our desk asking us to co-operate with them in the movement to celebrate the bicentennial by the planting of trees and shrubs as a permanent memorial to Washington.

We are pleased to co-operate and as our bit wish to make the following offer:

HALF PRICE SALE

To any school child we offer any fruit tree or shade tree or shrub in this catalog at ONE-HALF regular catalog price, to plant as a memorial to George Washington.

This offer does not apply to the “special bargains” listed throughout this catalogue.

Selected Shade Trees

MOUNTAIN ASH

It is the flashing orange red berries that catch your eye. A real ornamental tree. Dark lustrous foliage. Dense shapely heads covered with clusters of yellowish red berries cause exclamations of pleasure wherever seen. 4-5 ft. 65c, 6-8 ft. 90c, 1½-2 in. \$1.65, 2-2½ in. \$2.75. Drive in and see them.

Mountain Ash

WISCONSIN WEeping WILLOW

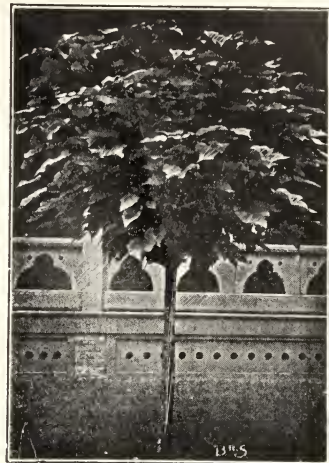

Long, fine, leaves borne on sweeping branches that reach to the ground when tree is a few years old. Tree grows to great height and becomes very picturesque. Prefers moist soil but does well anywhere. Grows rapidly. Price: 5-6 ft. trees, 75c; 6-8 ft., \$1.00.

CHINESE ELM

One of the newer Elms, having the duration of the Elm family but being a rapid grower. Adapts itself to all soils and grows on soils too poor for other trees. Tree forms a well-rounded head and grows to a tall, spreading specimen. Ideal for street trees. Price: 5-6 ft. trees, 60c each, 3-4 ft. Special 30c.

CATALPA BUNGEI

(Umbrella Tree)—Most popular tree for small yards, planting along driveways, in formal gardens, etc. Tree has a dense, round head, grafted on a tall, straight stem. Large leaves. Very hardy and does well anywhere. Price: 5-6 ft. trees, \$1.00.

Catalpa Bungei

MAPLE

ASH-LEAVED MAPLE—Grows 25 feet high, with light green foliage and smooth, greenish gray bark. It is very hardy. 6-8 ft. 50c, 1½ in. \$1.50.

RED-LEAVED MAPLE (Schwedler's Maple)—One of the most beautiful trees we know. Foliage in spring is brilliant purple, later changing to a rich, dark green. Leaves on the new growth during the summer are bright purple, making the tree always beautiful. Similar in habit of growth to the Norway. 6 to 8 ft. \$2.50.

Lombardy Poplar

LOMBARDY POPLAR

Very valuable for formal plantings because of its tall stately manner. A row of Lombardy Poplars makes a fine background for the home grounds. The leaves are dark, glossy green with silvery surface beneath. Price: 5-6 ft. trees, 50c each, 6-8 ft. 75c, 8-10 ft. \$1.50.

NORWAY MAPLE—Without a doubt the finest large, deciduous shade tree. It grows 40 feet tall, with large, round, handsome head, and dense, dark green foliage which remains on tree till late in fall. Reliable everywhere. 8 to 10 ft. \$2.00.

SILVER-LEAVED MAPLE—Where the quickest effect is wanted this tree is the best one. It is handsome, with leaves silvery beneath and light green above. It grows extremely fast and reaches 60 feet. 6-8 ft. 45c, 8-10 ft. 75c, 2 in., \$2.00.

CUT-LEAF WEeping BIRCH

The most graceful cut leaf tree. White bark; long pendulous branches with fine, deeply cut, green leaves. Does not grow to great height. Beautiful for specimens in the front yard or to plant in groups of three on large grounds. Price: 5-6 ft. \$1.25, 6-8 ft. \$2.50, 8-10 ft. \$3.50.

EXTRA SPECIAL

1 Ash Leaf Maple, 5-6 ft.	35c
1 Mt. Ash, 4-5 ft.	65c
1 Lombardy Poplar, 5-6 ft.	50c

Regular value \$1.50
3, one of each for \$1.00

While They Last

Silver Maple

Cut-Leaf Weeping Birch

Globosa Arbor Vitae

Evergreens

WONDERFULLY EFFECTIVE FOR WINTER LANDSCAPE

Why do so many of our customers wish evergreen plantings? First I think is the winter effect. When all other shrubbery looks dead they are green. At Christmas time they are beautiful in the snow. Especially the live Christmas trees gorgeously aglow with the colored lights—truly exemplifying the Christmas Spirit. Second they are beautiful in summer when the new growth shoots forth in all its glory. Third they decorate some styles of homes better than shrubs. Just as my lady adds a ribbon of color to her frock or just as

Pyramid Arbor Vitae

the mister picks on a tie for the “finished” effect. In 1932 a fourth reason might be added and that is the price. Evergreens are way down in price. Figure up the cost for your home. You’d be surprised.

The Angola Nursery has some forty varieties, all are beautiful if used in their proper place. Come in and see what you like. Pick it out to suit your home just as you would pick clothes for yourself. That is where the main beauty comes. Individuality for your home.

ARBOR VITAE

(Tree of Life) Type. Leaves shaped flat like the palm of your hand. These come in tall broad types, tall narrow or pyramid types, and in dwarf or globe types. Very universally used.

AMERICAN ARBOR VITAE—Tall broad base type. Easily trimmed. Good for specimen or for hedges. 18-24 in. 50c, 24-30 in. \$1.00; 2½-3 ft. \$1.75, 5-6 ft. specimen \$5.00.

PYRAMID A. V.—Tall narrow type. The aristocrat of the arbor vitae when height is desired with a narrow effect. The most widely planted of the arbor vitae. 18-24 in. \$1.00, 2-3 ft. \$2.25, 3-4 ft. \$3.50, 4-5 ft. \$5.00.

GLOBOSA A. V.—A globe type. These dwarf evergreens require no trimming and are very neat and natty. They set off a planting. 15 in. 90c, 18 in. \$1.25, 24-30 in. specimens, \$3.50.

COMPACTA—Similar to the globosa but a darker green. One of the best dwarfs. 12-15 in. 75c, 15-18 in. \$1.50.

Irish Juniper

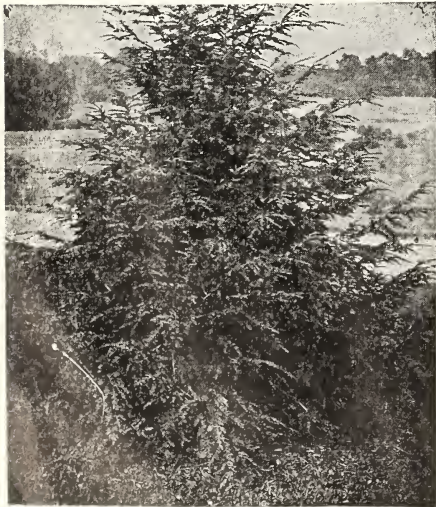

PEABODY’S GOLDEN—A variation of the American in that it is yellow in leaf. Very effective in group plantings. 3-4 ft. only, \$5.00.

BIOTA ORIENTALIS—A beautiful lacy tall type of flat leaf, 10-12 in. 35c, 18-24 in. 75c.

BIOTA AUREA NANA—A beautiful dense globe with a golden tip. Really a beauty and an aristocrat. 8-10 in. 75c, 18-24 in. \$2.50.

FIRS

So named for their softness. Stately, shapely trees that grow high. Noted in song and story. Wide at the base and tapering gradually in layer after layer of flat branches. Every planting is better for some of these.

Hemlock

CONCOLOR FIR (White fir)—Compact shapely resembles blue spruce in their blue white color. 18-24 in. \$2.50, 2-3 ft. \$4.00.

DOUGLAS FIR—Similar in shape but softer than Concolor. Dark green. Of rapid growth. A wonderful tree for background. 18-24 in. \$1.00, 2-3 ft. \$2.50.

HEMLOCKS

The Hemlock are noted for their lacy effect. Very slender and graceful. Hardy especially in shady places. You’ll like them. Price, 2-3 ft. \$2.50.

SPECIAL
Globe Arbor Vitae 4 yr. bushy specimens, planting size 50c each. While they last.

Sabina Juniper

Juniper Pfitzeriana

PINES

The pines need no description. All of you know them by their long needles and stately growth. Of course, there are dwarf varieties.

WHITE PINE—Tall. Rapid growing. Long needles. Good for group planting or for background. 2-3 ft. \$2.00, 3-4 ft. \$3.00.

AUSTRIAN PINE—Dense, vigorous grower, dark green. Not so upright as the White Pine. 2-3 ft. \$3.00.

SCOTCH PINE—Silvery green. Handsome. Similar in growth to Austrian. 2-3 ft. \$3.00.

MUGHO DWARF—Compact. A little beauty used either in beds by themselves or in groups of other dwarf evergreens. 12-15 in. \$1.50, 15-18 in. \$2.50.

SPRUCE

The spruces are noted for their stately growth and hardiness. Mostly rapid growers. Ideal living Christmas trees.

NORWAY—Perhaps the most popular spruce and most widely sold. Rapid in growth and shapely in form. Low in price. 12-15 in. 50c, 18-24 in. 90c, 2-3 ft. \$1.50.

COLORADO SPRUCE (Green)—Very symmetrical in form and beautiful. Good for either specimen planting or for groups. 2-3 ft. \$2.50, 18-24 in. \$1.25.

COLORADO BLUE—The "Shiners" of the spruce family. The most widely sought of all evergreens. Everyone knows about this evergreen. 10-12 in. 50c, 12-15 in. \$1.25, 18-24 in. \$2.00, 3-4 ft. specimens \$10.00. These are blue.

YEWS

The Japanese Yews are coming rapidly into favor. As yet they are rare. Have you some in your yard?

TAXUS CUSPIDATA—A Yew of dwarf growth. Spreading in habit. Very dark green. Really an aristocrat. See it at our Nursery. 2-3 ft. \$4.00.

Biota Aurea
Nana

JUNIPERS

Probably the most widely planted and the most satisfactory of all evergreens due to their ability to fight for their existence. Thrive where other varieties fail in the coal saturated atmosphere of the city. Probably the most varied in shape, color, and size of any evergreen. Hence some variety will fit any location and condition.

JUNIPER VIRGINIA—The ever popular red cedar type. Pyramidal in shape. Hardy. 2-3 ft. \$2.25, 3-4 ft. \$3.50, 5-6 ft. \$7.00.

JUNIPER VIRGINIA GLAUCA—The blue type of upright growing juniper. Its odd manner of growth and blue color makes it the "darling" of the Junipers. Everyone likes it. 18-24 in. \$1.50, 24-36 in. \$3.00, 3-4 ft. \$5.00.

JUNIPER CANARTI—Very similar in growth to the glauca above but green in color. Very popular. 18-24 in. \$1.50, 24-36 in. \$2.75, 3-4 ft. \$5.00.

JUNIPER PFITZERIANA—The low dwarf type, flat growing. Perhaps the most widely planted of all the Junipers of dwarf habit. No planting is considered complete without a few of these. Good for rock gardens. 15-18 in. \$1.50, 18-24 in. \$2.75, 3-4 ft. specimens, \$5.00.

Blue Spruce

JUNIPER SABINA—Dwarf Spreading. Dark green. A little more upright than the Pfitzer. Very satisfactory. Good for rock gardens. 15-18 in. \$1.50, 3-4 ft. specimens, \$5.00.

JUNIPER HORIZONTALIS—Creeping Juniper crawls and roots at points. Either in green or blue effect. Used in every rock garden or on banks. Very effective. 15-18 in. \$1.75, 18-24 in. \$2.50.

JUNIPER STRICTA (Spiny Greek)—A very beautiful light green evergreen. Needs to be seen to be appreciated. 12-15 in. \$1.00, 15-18 in. \$1.75, 18-24 in. \$2.50.

IRISH JUNIPER—Shaped like a round veranda column narrow and graceful. The green of the Emerald Isle. Very effective in suitable locations. You'll like it. 18-24 in. \$1.00, 24-30 in. \$1.75, 30-36 in. \$2.25, 3-4 ft. \$3.75.

It's not a home until it is planted.

Evergreen Trees are stately and majestic and most strikingly effective in masses. They are invaluable as screens against objectionable objects, and very popular for hedge planting. They also form a most admirable background for flower beds.

BEAUTIFY YOUR HOME WITH TASTY PLANTINGS

**FRESH DUG
SHRUBS OF BEST
QUALITY AT
LOWEST PRICES**

Many catalogues will come to your home. Some in color, gorgeous affairs showing you each plant in its natural leaf and flowers as nearly as the artist can copy nature. These pictures make one long to have one's home landscaped with these shrubs and flowers. Everyone has deep in his heart a love for the beautiful. Now with evergreens and shrubs and flowers so cheap that love can be satisfied.

This catalogue is not in color. We wish it were. But we are sending it to you who are within driving distance of our nursery and are asking you to drive in and see not the picture of the plant but the real leaf and branch and flower not as the artist paints it but as nature will grow it for your yard. Come visit us. Come when you wish, go where you please, ask us questions if you like. It is a pleasure and privilege to be of service to you. Our men will tell you where a shrub will thrive, where it will add beauty to your home and where not to plant it. Ask us. See the size and color of the plant, size and color of the bloom, and the general appearance as it grows.

HARDY SHRUBS

ARALIA PENTAPHYLLA—Five leaf Aralia—A distinct addition to your shrub planting. Nothing just like this medium sized shrub. You'll like it. 3-4 ft. size 50c.

ALTHEA OR ROSE OF SHARON—You all know this tree like shrub with its profusion of large tulip shaped flowers that come in July and August. Several colors. Red, pink, white, purple and variegated. Bush form. 18-24 in. 18c, 5 for 75c, 2-3 ft. 35c, 5 for \$1.50. Tree form 2-3 ft. 60c, 3-4 ft. 70c.

ALMOND—The flowering almond is that shrub that blooms early. Branches studded with small, rose-like, double flowers before the leaves appear, pink or white in color. Pink, 18-24 in. 45c, 2-3 ft. 65c. White same price.

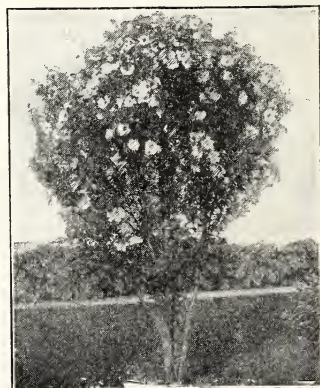

BARBERRY THUNBERGII—This barberry has become very well known. No shrub unless it is the Spireas has been more universally planted. No shrub takes its place for so many uses. Can be used most anywhere and always adds beauty wherever used with its luxuriant dark green foliage turning a brilliant red in the fall. The branches covered with bright red berries that hang on almost all through the winter make it one of the best winter shrubs. 12-15 in. 15c, \$12.00 per hundred. 18-24 in. 18c, \$18.00 per 100.

BARBERRY, New Red Leaf—Similar in growth to Barberry Thunbergii but has bronzy red foliage from early spring until autumn when the frost makes it even more brilliant. It too has the red berries that hang on into the winter. Must be planted in a sunny exposure. 12-15 in. 25c, 18-24 in. 50c, 2-3 ft. 75c.

BUTTERFLY BUSH—A perennial shrub in this climate but very desirable for its foliage and profuse lavender spikes of flowers on which hundreds of butterflies congregate. Plant a group of them for best effect. 2 yr. No. 1 plants 25c.

COTONEASTER ACUTIFOLIA—One of the more rare shrubs with glossy foliage and nodding flower clusters in May and June and black berries very profuse in late summer and autumn. Very good in border planting. 3-4 ft. 50c, 2-3 ft. 35c.

We have all sizes of shrubs. Take your pick. You will get the best in the size you wish at a price you cannot meet elsewhere. And they are dug fresh. You get no culls here.

Althea

Butterfly Bush

CORNUS—DOGWOODS

There are several varieties of these popular shrubs all valuable for their brilliant colored bark and handsome foliage. They make a bright show both in summer and the snow; the brilliant twigs make an attractive winter scene.

CORNUS SIBIRICA—Brilliant red twigs. One of the best for both winter and summer effect. 2-3 ft. 25c, 3-4 ft. 35c.

CORNUS ELEGANTISSIMA—This shrub has brilliant red twigs covered with beautiful variegated foliage. One of the aristocrats of the shrubs. 18-24 in. 35c, 2-3 ft. 50c.

CORNUS STOLONIFERA—Probably the most vigorous grower. Thrives anywhere. Dark red twig and heavy green foliage. 18-24 in. 25c, 2-3 ft. 35c, 3-4 ft. 50c.

JAPAN QUINCE

CYDONIA JAPONICA—Fiery red flowers cover this fine old shrub early in the spring so that it looks like a burning bush. The shrub itself is very attractive in shape and foliage. Also fine for hedges. 18-24 in. 25c, 2-3 ft. 35c, 3-4 ft. 50c.

DEUTZIA

Dainty is the word that describes the tassel shaped blossoms that come early in June. Everyone exclaims over the blossoms.

DEUTZIA GRACILIS—Dwarf type. Dense growing. Covered with a profusion of pure white flowers. 15-18 in. 25c, 18-24 in. 35c.

DEUTZIA PRIDE OF ROCHESTER—A very dense growing bush, growing five to six feet high. Shapely and attractive. 18-24 in. 15c, 2-3 ft. 25c, 3-4 ft. 50c.

FORSYTHIA

(Golden Bell)

Who has not been thrilled by this mass of golden yellow bloom that flashes on the horizon in the early spring almost before the tang of snow has left us. Brave flowers defying winter. Foliage too is beautiful with its dark green sheen lading the yellowish green branches.

FORSYTHIA FORTUNEI—Tallest and most slender. Erect growing especially desirable for filler in border plantings or at corners in foundations. 18-24 in. 15c, 2-3 ft. 25c, 3-4 ft. 45c.

FORSYTHIA INTERMEDIA—Earliest blooming often before snow is gone. Splendid shrub thriving anywhere. 18-24 in. 15c, 2-3 ft. 25c, 3-4 ft. 45c.

ELDERS

The Elders offer us variety in planting. Especially used for their contrast with other shrubs. 18-24 in. 25c, 2-3 ft. 35c, 3-4 ft. 50c.

GOLDEN ELDER—The golden yellow leaves are very pleasing in their contrast with other shrubs. 18-24 in. 25c, 2-3 ft. 35c, 3-4 ft. 50c.

CUT LEAF ELDER—This delicately cut foliage pleases everyone. A real addition to your planting. Your neighbors will envy you this shrub. 18-24 in. 25c, 2-3 ft. 35c, 3-4 ft. 50c.

EUONYMUS ALATUS

(Winged Burning Bush)

With its corky bark giving an appearance of "Wings", whence its name, this shrub can be used anywhere either for specimen planting or mass effect. Brilliant "burning" red foliage in Autumn. Very attractive. 2-3 ft. 75c.

BUSH HONEYSUCKLE

Very vigorous in habit. Thrive in shade or in sun. Foliage and flower are both attractive. The honeysuckles offer a variety of planting that appeals to everyone.

BELLA ALBIDA—Rich green foliage. Great fragrant clusters of white flowers and a wealth of bright red berries lasting until winter make this a wonderful shrub. 3-4 ft. 50c, 4-5 ft. 75c.

Some folk wish immediate effect in their plantings. They do not care to wait three or four years for shrubbery to grow. For these folk we wish to offer extra heavy 4-5 ft. shrub and big trees. If you wish to save two or three years, drive in and see this stock. Our landscape men will deliver and plant for you if you wish within a radius of 100 miles of our nursery. See map on outside back cover.

Cornus Sibirica

Pride of Rochester

Cydonia

Golden Elder

Forsythia

Fragrant Bush Honeysuckle

BUSH HONEYSUCKLE—Continued

TART RUBRA—Pink flowers and dark red berries. Perhaps the darkest of all honeysuckles. Very hardy. 3-4 ft. 50c.

FRAGRANTISSIMA (Evergreen Honeysuckle) — Round leathery leaves staying green practically all winter. Hence its name. Flowers small and very fragrant. 2-3 ft. 50c. 3-4 ft. 75c.

TART ALBA—Distinguished by its mass of yellow waxy berries this honeysuckle is a very desirable addition to any planting. Hardy, dense, vigorous grower. 3-4 ft. 50c.

HYDRANGEAS

In popularity the hydrangeas increase year after year. Their large mass effect in blossom is achieved by no other shrub. Easily grown, vigorous, attractive.

HYDRANGEA PANICULATA GRANDIFLORA — Blooms late, the large panicles of flowers turning golden bronze for autumn. Always a free bloomer. Fine for winter bouquets. 18-24 in. 30c, 2-3 ft. 50c.

HYDRANGEA A. G.—The snow ball type called "hills of snow", which describes very clearly the masses of white round bloom that comes in June. Very good for shady places. 18-24 in. 30c. 3-4 ft. 50c.

HYDRANGEA, TREE FORM—Truly a glorious sight are these tree form P. G. Hydrangeas. Sometimes as many as two hundred blooms are on an old tree. 3-4 ft. 85c, 2-3 ft. 65c.

LILACS

The picture one carries through life of "Lilac Time" accounts for the popularity of this shrub. Memories of childhood recall both the color and the fragrance of this old fashioned bush. Many new varieties have been introduced, adding enrichment of color.

Common purple	2-3 ft. 20c; 3-4 ft. 35c
Common white	2-3 ft. 25c; 3-4 ft. 45c
Persian purple	2-3 ft. 35c; 3-4 ft. 50c
French named varieties	2-3 ft. 75c; 3-4 ft. \$1.25

MAHONIA

AQUIFOLIA—Handsome native evergreen, medium size shining, prickly leaves and showy. Bright yellow flowers in May followed by bluish berries. Very useful in decorative planting for its neat habit and bronze-green leaves. 12 to 15 inches 50c each.

Our French Pussy Willows are exceptionally fine Catkins, as large as your thumb. Extra Special, 5-6 ft. size for 75c.

Hydrangea P. G.

Lilac, Common Purple

PUSSY WILLOW

The cultivated variety of the French Pussy Willow has made quite a sensation. The branches

sell readily in Winter for attractive prices. A beautiful round shrub in Summer. In Winter the branches may be cut and placed in a vase of water and placed in a warm sunny window where they will unfold their large catkins of silvery pink and continue to be attractive for several weeks. 2-3 ft. 50c, 3-4 ft. 60c.

PHILADELPHUS OR MOCK ORANGE

Another shrub of our grandmother's days that is still a favorite with its waxy like flowers and dark green foliage. It can now be had in several improved forms. Some of them semi dwarf. Thrives most anywhere and used extensively in borders or for screens or as specimens.

PHILADELPHUS CORONARIUS—Tall, graceful, free bloomer, one of the best. Good anywhere. 2-3 ft. 25c, 3-4 ft. 50c.

PHILADELPHUS LEMOINE—A semi dwarf type, Very dense, fine stemmed with creamy white flowers in June. 2-3 ft. 50c.

PHILADELPHUS—Continued

PHILADELPHUS, MONT BLANC — Medium dwarf type. Flowers double, set in bouquet like masses. Slightly fragrant. One of the best for medium height plantings. 2-3 ft. 50c.

PHILADELPHUS VIRGINALIS—Everyone admires this wonderful new Mock Orange. Virginalis has unusually large semi double flowers very sweetly fragrant. Blooms all season. Best known and most popular of all. 2-3 ft. 50c, 3-4 ft. 75c.

PHILADELPHUS AUREA—Golden leaf, medium height. Very attractive. 15-18 in. 50c, 18-24 in. 75c.

SPIREAS

Numbering some twenty varieties this species are perhaps the best known and most popular of all shrubs. Varying in size from the smallest dwarf sizes to shrubs that reach eight to ten feet and varying in color of leaf and blossom they furnish an almost endless variety of attractive plants for almost every location.

SPIREA ARGUTA—One of the showiest of spring shrubs, flowering in early May; dense masses of white flower clusters along drooping branches; Leaves light green, narrow, giving lace-like, beautifully soft appearance. 18-24 in. 20c, 2-3 ft. 25c, 3-4 ft. 50c.

SPIREA ANTHONY WATERER—Dwarf type well known. Dark green foliage and rosy crimson bloom. Very vigorous in growth. More used than any other dwarf on account of its beauty. 15-18 in. heavy 35c. 18-24 in. 50c.

SPIREA BILLARDI—Upright in growth with long spikes of rose pink flowers. Very attractive. Used in group planting and thrives especially in moist ground. 3-4 ft. 50c.

SPIREA FROEBELI—A size larger than Anthony Waterer and of similar appearance in leaf and stem. Reddish pink blossom during the season. 18-24 in. 35c, 2-3 ft. 50c.

Spirea Van Houttei

SPIREA VAN HOUTTEI — Sometimes called bridal wreath. The most widely used of all shrubs. Truly beautiful when in full blossom its mass of white meets the eye. 18-24 in. 15c, 2-3 ft. 25c, 3-4 ft. 35c, 4-5 ft. 50c.

VIBURNUM

VIBURNUM OPULUS (High-bush Cranberry)—Perhaps the most showy of this large family of shrubs. Sturdy plants with heavy foliage. Grows rather high bearing large branches of crimson berries that hang on throughout the winter. 2-3 ft. 45c, 3-4 ft. 60c.

VIBURNUM CARLESI—A recent valuable introduction from Korea. Bush of rounded form, dark green oval leaves. Buds pink and flowers white which hang on for a long time. 12-15 in. \$1.00.

Spirea Billardi

SNOWBALL—VIBURNUM STERILIS

The old fashioned snowball in blossom for Decoration Day is another memory like that of "Lilac Time." Back into favor is this old bush of our childhood days. 2-3 ft. 35c. 3-4 ft. 50c.

JAPANESE SNOWBALL—Purple tinted leaves make this shrub beautiful when not in bloom. Flowers in June with a great mass of flowers. 18-24 in. 35c, 2-3 ft. 50c.

SPECIAL

Some extra nice Spirea Arguta, 4 ft. Bushy Clumps, too heavy to mail. Rather expensive to ship. To our drive in customers, 60c each, 6 for \$3.00. Special Van Houttei, 18-24 in. Bushy, 3 for 25c, while they last.

SUMAC

CUT LEAF SUMAC—The aristocrat of the Sumac family. The fern like leaves are attractive in summer and turn to a brilliant red in Autumn. 18-24 in. 25c, 2-3 ft. 35c, 3-4 ft. 50c, 5-6 ft. \$1.00.

Japanese Snowball

Weigela Eva Rathke

North side of buildings. A beauty when autumn darkens the berry. 18-24 in. 20c. 2-3 ft., 35c.

WEIGELA

The showy stemless bell like flowers of this family of shrubs are very striking. Showy masses of pink and brilliant red flowers in June and July make these shrubs gorgeously beautiful. Vigorous tufty heavy with foliage a valuable plant.

WEIGELA EVA RATHKE—A charming new variety. The most distinct and one of the most attractive. Of smaller growth than the other Weigelas, only reaching a height of 3 to 4 feet, and spreading in character. Flowers are a brilliant crimson and when blooming in June is exceedingly showy. Blossoms twice in one season. Strong, 2-year, 18-24 inch bushes, 35c each; \$3.50 per doz.

WEIGELA ROSEA—This is one of the most popular of

SNOWBERRY—SYMPHORICARPUS

The beauty of these shrubs is often overlooked because of their ease of growth and cheapness of price. Extra good for shady places. Vigorous and attractive. They too are coming back in favor.

WHITE SNOWBERRY (Symphoricarpus Racemosus) — Pink flowers dark green leaves. Upright growth. Thrives nearly everywhere especially good in shade. The mass of large white berries that hang on most of the winter are its beauty. 18-24 in. 20c. 2-3 ft. 35c, 3-4 ft. 50c.

CORAL BERRY (Symphoricarpus Vulgaris)—Dark glossy masses of coral lasting most of the winter, make this shrub especially desirable. Glossy foliage. Semidwarf in habit. Grows well in shade or on

Weigela Rosea

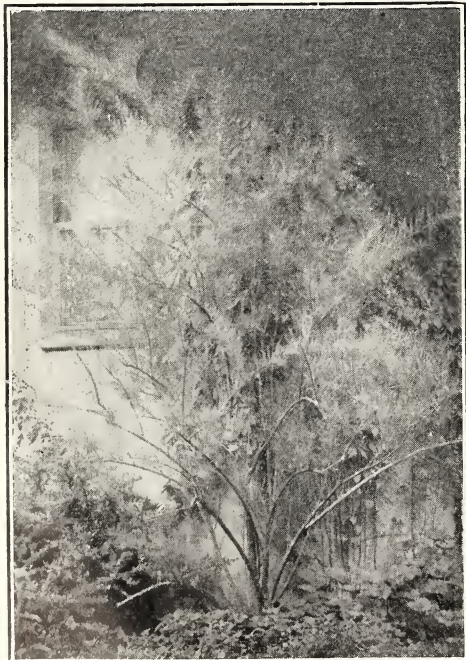

White Snowberry

all the Weigelas. A tall growing, vigorous sort with deep pink flowers, trumpet shaped, that are borne thickly along the stem in greatest abundance during June and more sparingly at intervals throughout the summer. 2-year, 18-24 inch plants, 20c each; \$1.10 for 6; or \$1.90 per doz.

TAMARIX

AFRICANA—Tall shrubs, 8 to 10 feet tall, fine, feathery foliage like the Juniper. Small, unusually bright pink flowers, in slender racemes in April and May. Splendid for planting in damp or other places. 2-year, 18-24 inch specimens, only 25c each.

TARARIX HISPIDA—Flowers extra large bright pink. The foliage is a silver blue. Very striking. Blooms in mid summer and to some extent later. 2-3 ft. 35c. 3-4 ft. 50c.

Tamarix

Coral Berry

Hardy Roses That Bloom!

FIELD GROWN TWO YEAR OLD PLANTS

RED AND CRIMSON SHADES

AMERICAN BEAUTY—The fame of American Beauty roses is world wide. It still reigns supreme. The rich, glowing crimson flowers, shaded and veined, are immense in size. Very double. Borne on long, stiff stems and the fragrance is that of the old Damask rose. Exquisite and unequaled. 50c each.

RED RADIANCE—The flowers are large, globular, of an even shade of clear red, without a trace of any other color, retaining its vividness for an unusually long time after being cut. It is a remarkable bloomer, being constantly in flower from early spring until freezing weather. Strong, vigorous branching grower, each branch terminating in a large, bold, double bloom. 50c each.

E. G. HILL. New—Great massive blooms of deep maroon, velvety on inside and glistening outside; very perfumed with old-rose fragrance. \$1.00 each.

GENERAL JACQUEMINOT (The "Jack" Rose)—The fragrant, perfectly formed blossoms come early and are brilliant scarlet-crimson on long strong stems. 50c each.

PREMIER—A magnificent variety of large size; deep rose color, with a broad roll to the outer petals. 50c each.

Lady Hillingdon

Sunburst

GRUSS AN TEPLITZ, The Sweetest, Richest Crimson Hybrid Tea Rose—One of the world's twelve best roses. The intense, dazzling color of this rose is found in no other variety. Fiery crimson, shaded with a dark, velvety sheen, totally unlike any other color in the world. 50c each.

See back cover of catalogue envelope for another rose special.

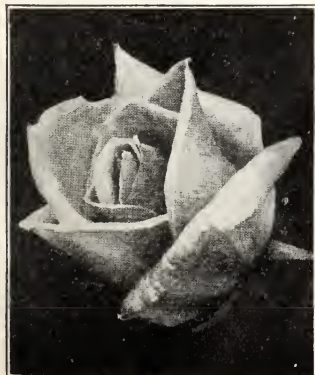

ETOILE DE FRANCE — Bushy plants with large, dark crimson blooms. Has long been popular and in great demand. 50c each.

Our roses are all 2 year field grown. Do not confuse these with small size roses at a cheaper price. Ours will bloom this year.

La France

PINK SHADES

PINK RADIANCE—Gloriously formed flowers, immense in size, exquisite fragrance, grand foliage, healthy growing, fine color, always in bloom. The color is a beautiful—bright carmine-pink. Hardy everywhere. One of the world's twelve greatest roses. 50c.

PINK KILLARNEY—Remarkable for its freedom of bloom and the large size of its intensely fragrant flowers. The buds are large, long and pointed. Color is exquisite, a brilliant imperial pink, sparkling and beautiful almost beyond description. 50c each.

PRESIDENT HERBERT HOOVER—An outstanding novelty of a really new color combination; Maroon, orange, and gold, rioting in the most contrasting fashion. Long-pointed buds, rigid stems, and a continuous cropper makes it one of the most popular florist's Roses. Equally as good in the garden and one of the best fall bloomers. \$1.00 each.

COLUMBIA—Popular greenhouse variety which does well outdoors, producing long-stemmed, pointed flowers of vivid pink throughout the entire season; very perfumed. 75c.

MME. CAROLINE TESTOUT—The great Portland Rose. The large rounded flowers are bright satiny pink with darker center and edges of petals soft carmine pink. 75c each.

PAUL NEYRON—Once seen never forgotten. Flowers often six inches in diameter; fragrant clear pink blooms, shading to rose, produced by a vigorous plant that blooms well all Summer. 50c.

BRIARCLIFF—The most recent and the best sport of Columbia. Fine, handsome flowers of the even shade of silvery rose-pink. \$1.00 each.

LA FRANCE—One of the older varieties, still a favorite; large long pointed buds, flowers large and full, delightfully fragrant. 50c each.

YEAR**

WHITE OR NEARLY WHITE SHADES

WHITE KILLARNEY—A pure white sport of the famous and popular Killarney rose, identical in every way with its parent except its color. 50c each.

WHITE RADIANCE—Beautiful white rose of same general appearance of Red Radiance and Pink Radiance making an attractive trio. 75c each.

YELLOW SHADES

MRS. AARON WARD—Very distinct, coppery orange in the bud, golden orange when partly developed and pinkish fawn when fully opened. Splendid in form; always blooming. 75c each.

L O S ANGELES—Flowers large and continuous, in color a flame-pink, toned with coral and shaded with translucent gold at the base of petals. \$1.00 ea.

LUXEMBURG—A fine, large, fully double rose of vigorous branching habit, unusual freedom for the color, which is a rich golden yellow. \$1.00 each.

White Radiance

WHITE OR NEARLY WHITE SHADES

FRAU KARL DRUSCHKI—Very vigorous growth, with gigantic white buds and blooms. A Hybrid Perpetual but the most popular white Rose in existence. 50c each.

EDEL—Splendidly shaped, large, very double white flowers of exquisite texture. Plants vigorous and healthy. 50c each.

Talisman

REV. F. PAGE-ROBERTS—Marvelously colored flowers of golden yellow stained with copper, and reddish buff on the outside. One of the most popular in the world and planted in great quantities every year. \$1.00 each.

MME. EDOUARD HERRIOT—The original of all the bright orange-pink varieties and still one of the best. Deserves its wide popularity. \$1.00 each.

LADY MARGARET STEWART—Stout, erect plants with immense, copper-orange buds, opening to bright golden yellow flowers of wonderful shape and luscious color. 75c each.

SOUVENIR DE CLAUDIUS PERNET—A beautiful pure sunflower yellow, deeper in center. The long pointed buds open to full double, moderately fragrant flowers; large, glossy, disease-resisting foliage; a vigorous grower. 75c each.

SUNBURST—Bright glowing orange blooms, giving an excellent imitation of a real Sunburst; a very fine variety. 75c each.

WILLIAM F. DREER—Soft, silvery shell pink, at times creating a golden illusion through reflection from the base of petals which are definitely gilded. A magnificent vase buds, and when half expanded. 75c.

Hardy Climbing Roses

CLIMBING AMERICAN BEAUTY—The moderately fragrant, rich rosy crimson, three-fourths inch flowers are produced in great abundance. 50c.

CRIMSON RAMBLER—Great masses of crimson, semi-double flowers are borne by these vigorous plants. Desirable pillar and porch plant. 35c.

DOROTHY PERKINS—One of the most notable climbing Roses. Clear cherry-pink, slightly fragrant; borne in great profusion and lasts a long time. 25c each.

DR. VAN FLEET—Probably the best climbing Rose in cultivation. Perfectly formed, long pointed, deep pink buds on long stems, with several in a cluster that open to a lighter shade of pink. 35c.

EXCELSA—An intense crimson, with the edges of the petals a little lighter, produced in immense clusters. Foliage glossy. 35c.

LADY HILLINGDON

—The always popular, beautiful apricot-yellow Tea Rose with lovely buds and exquisitely formed open blooms produced continuously. Probably the hardiest of all Tea Roses and undoubtedly the best yellow bedding Rose. 50c each.

WILLOMERE—This is the Rose to plant where Los Angeles does not succeed. It has wonderful long-pointed buds and magnificent brilliant pink flowers suffused with a golden light. The plants are erect, very vigorous, and constantly throw up splendid sprays of bloom. 75c ea.

TALISMAN—The most astounding novelty in Roses produced in many a year. Its brilliant yellow and orange red buds open to a large, fragrant bloom of glowing golden yellow, stained with copper-red and orange-rose on the inside of the petal. It is the most magnificently colored flower we have ever seen and arouses astonishment and admiration everywhere. The plants have proved vigorous and healthy outdoors and have withstood severe winters unprotected. It is especially good in spring and late autumn. \$1.00 each.

Paul's Scarlet Climber
type at its best as

HARDY CLIMBING ROSES—Continued

PAUL'S SCARLET CLIMBER—The brightest and purest red of all the Pillar Roses. No other Rose, in any class, can compare with this for brilliancy of color which is a vivid scarlet. Flowers are semi-double, very freely produced in clusters of from 3 to 25 flowers each on much branched canes. It is of a strong climbing habit and perfectly hardy. One of the most popular climbing Roses. 35c.

WHITE DOROTHY—Closely resembles Dorothy Perkins except for its immense clusters of pure white flowers. The most valuable white climber of its class 35c.

TAUSENDSCHOEN (Thousand Beauties)—Covered with bright blossoms of every imaginable shade from white to deep pink, borne in clusters; quite double. 35c each.

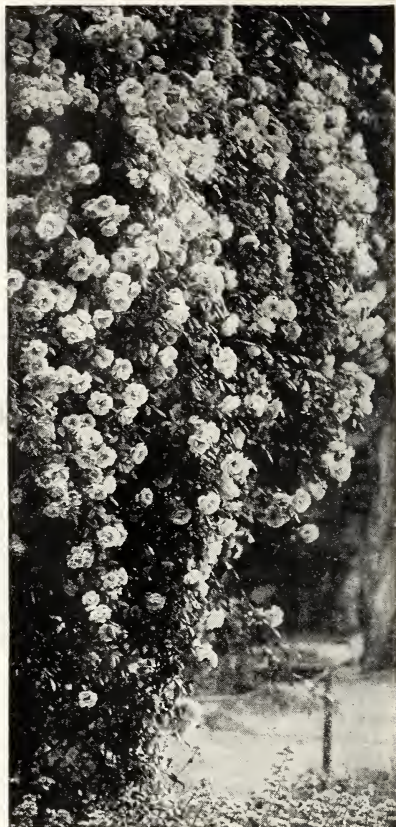

JACOTTE—Color deep coppery yellow, tinted coppery red, borne several together on long stems. Very fragrant. 75c each.

MARY WALLACE—Large, semi-double flowers, 4 inches across; color clear rose pink with salmon at base of petals. Hardy everywhere. 50c each.

Climbing American Beauty

CHARMING BABY RAMBLER ROSES

Dainty, dwarf-growing Polyantha Roses excellent for bedding, clumps, single specimens or for pot culture. Hardy, healthy, exquisitely beautiful.

IDEAL—Really the finest dark red—darker, more even color than Miss Edith Cavell. Flowers small and in gigantic clusters. Each 50c.

RED BABY RAMBLER—Beautiful clusters of bright red flowers. Splendid grower. Each 50c.

MISS EDITH CAVELL—Recommended as the best, bright crimson with white eye; enormous clusters; strong growing, very dwarf. Each 50c.

ELLEN POULSON—Dark brilliant pink. Each 50c.

KATHARINA ZEIMET—Great clusters of small, pure white, highly perfumed blooms very freely produced. A fine edging variety. 50c.

LAFAYETTE—Semi-double, lasting, fragrant, bright cherry-crimson flowers, borne in immense clusters. 50c each.

ORANGE PERFECTION—Orange-red. Probably the best of the type for general purposes. 50c each.

SUPERBA—The deepest maroon Polyantha. Vigorous bush, throwing large flowering heads in quick profusion. 50c.

RUGOSA AND HYBRID RUGOSA ROSES

F. J. GROOTENDORST—A cross of the red Rugosa Rubra by the Crimson Baby Rambler, with Rugosa growth and foliage and small, bright crimson flowers of the Baby Rambler type, produced in clusters throughout the season. Particularly suitable for hedges and massed planting. 50c.

Dorothy Perkins

Hardy Perennial Plants

"Flowers are the sweetest things God ever made and forgot to put a soul into."—Beecher.

Price of all perennials unless otherwise noted. 15c each, \$1.25 per 10.

Flowers for your gardens, Flowers for your table. How easy it is to have them when you plant the hardy perennials. Colorful blossoms from early spring to late fall. Hardy, easy to grow, they remain in the ground year after year. The foliage dies each winter but they come up again each spring. Often the early flowering types open their petals before the snow has entirely disappeared and the late ones are killed only by severe freezing. With care in selection you may have a succession of bloom throughout the season, an everlasting, endless variety of entrancing beauty.

The Angola Nursery Co. has specialized in rock garden plants, both the common kinds and the Alpine plants. See page 19 for a partial list. Some of the more rare ones are of such limited quantity that we do not catalogue them. Write us your needs or better, drive in.

ALYSSUM, Saxatile Compactum (Basket of Gold)—Produces a great mass of golden flowers in May; useful for rockery or border; grows 10 to 15 inches.

ANCHUSA, Italica (Giant Forget-Me-Not)—Tall spikes bearing an abundance of gentian-blue flowers through the season, if kept cut. Grows 3 to 4 ft.

AQUILEGIA (Columbine or Honeysuckle)—A desirable plant, thriving most everywhere. Remains in bloom a long time and can be had in various colors. (See page 15 for illustration). 2-yr. plants.

ARABIS, Alpina (Rock Cress)—Produces a mass of small white flowers in early Spring. For border or rock garden, grows 6 to 10 inches.

ARTEMISIA, Silver King—Has attractive silver colored foliage useful as trimming in bouquets and will last when dried. 35c ea.

Aquilegia

SUPER SPECIAL

4 Gaillardia, 4 Shasta Daisy, 4 Pinks, 4 Coreopsis,
4 Painted Daisy, 4 Bellis

24 perennial Super Special, 2-yr. field grown plants. All for \$1.00 and the names of 5 neighbors who are interested in Perennials or Roses.

BLEEDING HEART (*Dicentra spectabilis*)—The old-fashioned variety with heart-shaped flowers on drooping spikes. Blooms early in Spring. 50c each.

BELLIS (Double English Daisy) Perennis—Very popular charming edging plant with pretty button-shaped flowers in early Spring. Succeeds in shade or sun.

CAMPANULA (Canterbury Bell) (Bell Flower)—Splendid and rich subjects for the border, garden or rockery. They like a good rich soil and last longer if planted in half shade. Flowers, blue, white and rose; corolla large and bell-shaped. Bright and attractive. Fine specimen for the floral gardens of the North where they do well in sunny exposure. In the South they prefer half shady places.

Bleeding Heart

Digitalis

Cup and Saucer, Campanula Calycanthema—The flowers are tubular bell-shaped with a saucer-like petal fringed at the base, giving the appearance of a cup and saucer. They bloom in June and early July on plants 2½ ft. tall. Biennials blooming the second year from seed sown in June.

Campanula Carpatica, Harebells—A dwarf Campanula forming compact clumps only 8 to 10 inches high. The flowers are dainty, cup-shaped, 1½ inches across and evident from June to October.

CARNATIONS—Hardy Border—Highly regarded for their spicy perfume, bright colors, and charming appearance. Protection ordinarily insures their permanency and early Spring bloom. Mixed colors in many shades.

COREOPSIS, Lanceolata (Tickseed)—One of the most popular hardy perennials. The flowers of a rich golden yellow, of graceful form and invaluable for cutting; blooms the entire summer. Easy culture in any position.

DIGITALIS (Foxglove)—The Foxgloves are old-fashioned and dignified and wholesome company in the choicest garden.

GIANT SHIRLEY FOXGLOVE—Extraordinary size and vigor, growing 6 to 7 feet tall. The flower stems are 3 feet or more long, crowned with big bell or thimble-shaped flowers. Colors range from white and shell-pink to

deep-rose, many dotted with crimson and chocolate. Very handsome and attractive.

DELPHINIUM, HARDY LARKSPUR

Their popularity is growing each year because of the stately magnificence of the flower spikes, and their beautiful shades of coloring. Belladonna, Bellamosa, and Hybrids with good culture grow 3 to 6 ft. tall, bloom in June and July, and if cut back and fertilized after bloom will often give more flowers in late summer or early fall.

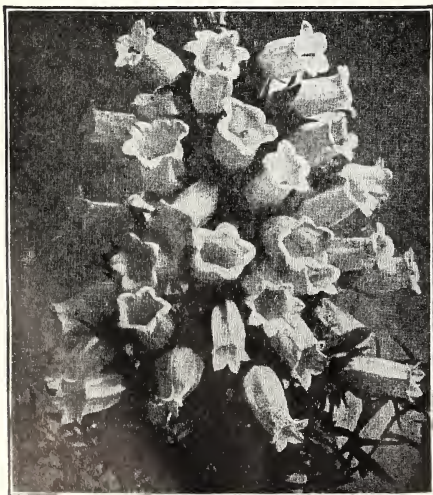

BELLADONNA—The most continuous blooming of all—blooming from early June until frost. The clear turquoise-blue flowers are very delicate and beautiful and are the most popular of all Delphiniums.

BELLAMOSA—Similar to Belladonna in form and habit but with a color of much deeper and richer blue.

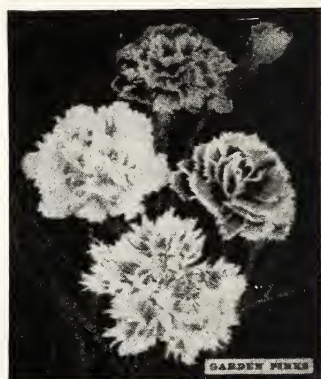

GOLD MEDAL HYBRIDS—These hybrids embrace a wonderful collection of hybrid Delphiniums. The shades range from pale lavender to deep indigo blue, a glorious mixture. This strain is from the gardens of a foremost California grower, who is constantly seeking to bring out new shades.

CHINENSIS, Blue and White—A distinct type with dwarfier plants, 18 inches graceful stems with flowers loosely arranged.

Visitors are always welcome at our Nursery and we enjoy having you call any time.

Campanula

Garden Pinks

DIANTHUS

DIANTHUS, Newport Pink—Watermelon-pink or salmon rose, a beautiful strain for massing, bedding or borders. Fine for cutting.

DIANTHUS (Pink) Barbatus (Sweet William)—The Sweet William is one of the oldest garden flowers and sure to be found in the "Old Fashioned Garden".

DIANTHUS-DELTOIDES (Maiden Pink)—A beautiful little plant with narrow leaves and bearing a profusion of small, crimson flowers during June and July. Easily grown on rockery. One of the best border Pinks.

DIANTHUS-ALLWOODI—The new perpetual-flowering Hardy Pink. Perfectly hardy and flower continuously from early Spring until late Autumn, deliciously clove scented.

CAESSIUS, CHEDDAR PINKS—A dwarf compact form producing very dense green mat of foliage. The bright rosy-pink fragrant flowers are produced freely in May. 6 in.

GAILLARDIA, Grandiflora (Blanket Flower)—The Gaillardias are conspicuous for profusion and duration of flowers. A constant succession is produced all summer until very late into the autumn. Are fine for cut flowers, lasting well in water. Rich tawny shades with a hardy center of deep maroon, bordered by petals of orange and yellow of various shades. They thrive best in light, open, well drained soil and should have full sunlight and air. The plant has dense tufts of drooping leaves, is hardy and may be grown anywhere.

Special one doz. of 15c perennials listed on pages 15, 16, 17, 18, for \$1.00, Your Choice.

Lathyrus

GEUM COCCINEUM, Mrs. Bradshaw (Chiloense)—A splendid new variety, with large, double flowers of fiery red, blooming nearly all summer. Very attractive.

GEUM, Lady Stratheden—A new introduction of great merit. Rich golden-yellow blossoms, counterpart of Mrs. Bradshaw. Fine for hardy garden.

GYSOPHILA, Paniculata (Baby's Breath)—A very popular and beautiful old fashioned plant, bearing a profusion of small flowers useful for mist-like effects in mixed borders and trimming for bouquets. A most graceful subject. Stems stiff and wiry, therefore, excellent for cutting. Very branchy or spreading. Of easiest culture in open, rather dry places. Desirable for rock-work. They make an excellent effect as filling amongst shrubbery or covering for unkept places with a mass of delicate bloom.

GYSOPHILA, Repens—A beautiful trailing or prostrate plant, ascending at ends, with clouds of small white and pink flowers. Best adapted to the rockery and mixed borders; blooms from midsummer to Autumn.

HIBISCUS MALLOW—Large free growing shrub-like plants forming clumps 4 to 5 feet high, with handsome green foliage bearing throughout the late summer immense single flowers 4 to 6 inches across.

LIATRIS (Blazing Star)—(Gay Feather) Pycnostachya—A choice and bold species from 3 to 5 feet tall. Grow and produce flowers in poorer soil than most garden plants, but prefer a rich garden soil, and require no special attention.

LUPINUS (Lupines)—The Lupines are showy plants with conspicuous flowers in terminal racemes of blue, white and beautiful shades of rose. They require only well prepared garden soil, preferably in semi-shady location. Perfectly hardy. Stout, erect species grow 2 to 3 feet tall.

DOUBLE HOLLYHOCKS

Is there anybody who does not admire the stately beauty of these tall plants with their large handsomely colored flowers? They are extremely effective for screens and backgrounds, and have become one of the most popular of hardy garden plants. Their dignified stately habits and the beautiful color effect of their blooms make them an almost indispensable part of any hardy garden. We offer them in separate colors and in mixtures.

White, yellow, scarlet, Newport pink, maroon, salmon.

DOUBLE MIXED—The flowers are fully double—huge rosettes of rich colors.

SINGLE MIXED—Includes the fringed type and many colors. Very fine.

LATHYRUS, Hardy Sweet Peas, *Latifolius*—Hardy perpetual blooming Sweet Peas, fine for covering old stumps, fences, etc. They are perfectly hardy, increasing in beauty each year. Valuable for cutting.

LINUM PERENNE, Blue Perennial Flax—The flowers are small, flat, fine petaled of pretty azure blue, borne early May to July. The plants are erect, 1½ to 2 ft. high, with branching leafy stems. An excellent rock garden or border plant.

LYCHNIS, *Campion*, *Chalcedonica*, *Maltese Cross*—From June until the middle of July the plants are covered with the most fiery scarlet flowers, and it is sometimes called Burning Star. Each individual flower forms a small Maltese Cross.

PHYSALIS (Chinese Lantern Plant), *Franchetti*—An ornamental plant forming dense bushes about 2 feet tall, producing freely its bright orange-scarlet lantern-like fruits, which can be cut for winter bouquets and decorations. Novel and interesting.

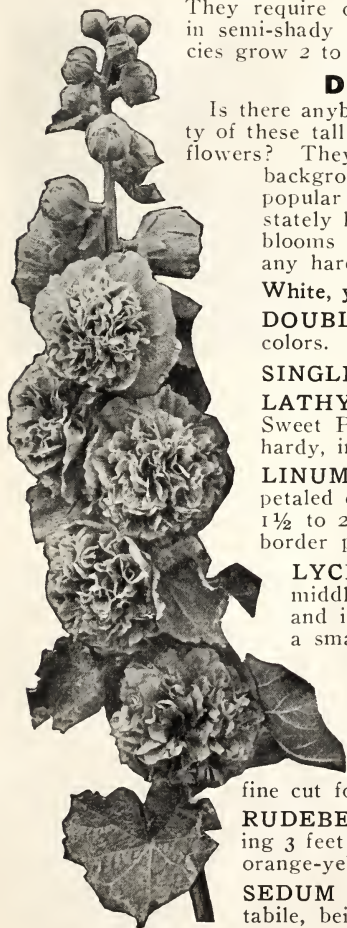

PYRETHRUM ROSEUM (Painted Daisy)—Has very attractive fine cut foliage with flowers on long straight stems, colored in all shades.

RUDEBECKIA, *CONEFLOWER*—A perennial form of *Rudbeckia* growing 3 feet tall, and producing freely in Autumn its large attractive flowers of orange-yellow with black center cone.

SEDUM "BRILLIANT"—Erect and showy. Rich colored form of the *Spectabile*, being a bright amaranth-red. Late Summer and Fall. A fine border plant.

Lupinus

Double Hollyhocks

Yucca

SAPONARIA (Soapwort)—*Ocymoides Splendens*—Pretty border and rockery plant; flowers a rosy-pink, in loose broad cymes. 25c each.

VIOLA CORNUTA, Hardy Tufted Pansy or Pansy Violet—Very desirable free flowering subjects for the hardy border and the rock garden. They combine the beauty and free blooming habits of the Pansy with the hardy character of the Violets. The plants will not run out like the common Pansy nor are their flowers large but they are produced in profusion during the entire season.

YUCCA (Adam's Needle) *Filamentosa*. A beautiful palm-like looking plant with broad sword-like foliage. Flowers are large and fragrant, creamy white, flowering in June and July. One of the most stately plants for garden purposes.

POPPY, Orientale—Very large, orange-scarlet; measure 5 to 6 inches across.

PLATYCODON OR CHINESE BELLFLOWER—A splendid bushy perennial growing 2 to 2½ ft. high and bearing during the latter part of the summer a profusion of large five-pointed bell-shaped flowers. The flower buds before opening resemble small balloons.

HARDY PHLOX

R. P. STRUTHERS—Rosy carmine with claret eye.

THOR—Salmon pink overlaid with scarlet glow, almost resembling a halo, surrounding a red eye. Very large trusses.

RHYNSTROM—Beautiful rosy pink that is a good strong grower.

ECLAIREUR—A rare shade of salmon pink intensified by a distinct claret red eye.

MRS. JENKINS—A pure white with large trusses. Very good bloomer.

SHASTA DAISY—Large flowered, improved Burbank plants extremely productive of bloom.

TRITOMA, PFITZERI (Red-hot Poker, Flame Flower or Torch Lily)—The sensation of the garden, border or bed; growing with rush or sword-like foliage on flower stock a yard in height with a single fiery cone 4 to 8 inches long composed of perhaps 100 or more tubular, drooping flowers, each an inch or more long. Bloom of a rich orange blending into scarlet producing a gorgeous effect. Very popular. Should be well protected.

Tritoma, Pfitzeri

SPECIAL FREE

With each one doz. perennials at regular price ordered before April 1st we offer free 1 Chinese Elm, 2-3 ft. The fastest growing shade tree in America. See back of Catalog envelope for Special on Chinese Elm.

Platycodon

HARDY CHRYSANTHEMUMS

Universally popular for outdoor bedding. They give a lavish display and a profusion of bloom, color, life and beauty to the garden just at a time when other flowering plants have passed. Frost does not affect the flowering and often these may be cut in late November. They are quite hardy if planted in a well drained location with a good covering of leaves or litter during winter. 20c each; \$2.00 per dozen.

AUTUMN GLOW—Bright rosy red. October 1.

BOSTON—Bronzy orange, tall. October 15.

CAPT. COOK—Dark rose with brownish center. Oct. 15.

GLORY OF SEVEN OAKS—Best and earliest golden yellow. Ever-blooming hardy 'Mum. Popular for any use. June and Sept.

GOLDEN QUEEN—Bright yellow incurved petals. Sept. 25.

INDIAN—Coppery red. October 10.

MODEL OF PERFECTION—Small bronze yellow. Oct. 15.

OLD HOMESTEAD—Salmon pink. Oct. 1.

MARIE ANTOINETTE—Deep pink. Midseason.

Phlox, R. P. Struthers

Rock Gardens

There is nothing in Gardening that is quite so fascinating as a **Rock Garden**. It has almost unlimited possibilities and brings into use many beautiful plants and flowers that are little known, because they can hardly be used in any other form of gardening. A **Rock Garden** possesses a fascination of its own and if you do not have such a garden, by all means get one started this year.

PRICES: All Rock Garden Plants, unless otherwise noted, 15c each, \$1.25 per 10.

ALYSSUM—Showy free flowering spring-blooming plants. Valuable for front row in border or rock garden.

Saxatile, Compactum (Basket of Gold)—9 in. May-June. Producing masses of golden flowers very early.

Rostratum—20 in. Flowers deep yellow in dense heads which fairly cover the plant in summer. Leaves two inches long, broad and oblong, pointed and hairy.

ANCHUSA—Stately and handsome perennials belonging to Forget-me-not family. The leaves are rough and hairy and the drooping flowers are borne in racemes on branching stems.

ANEMONE (Wind Flower)—pulsatilla (Pasque Flower)—1 ft. April-May. Well adapted for rock work or border, flowers varying from lilac to purple. 20c each.

Rubra—6 to 9 in. April-May. red, erect flowers. 20c each.

ARTEMISIA Silver King—3 ft. Is comparatively new in gardens. Its striking gray stems and leaves and rapid branching habit stamp it as unique among foliage plants. The flowers are insignificant, but it makes up for this lack by its slender ghost-like appearance. Plants, 35c each.

ARABIS (Rock Cress)—Charming dwarf spring flowering plants of easy cultivation; valuable for beds, edgings. They do well in any soil, but need plenty of sun.

AUBRIETIA—One of the daintiest and most delicately beautiful of all dwarf, creeping plants for carpeting beds or rockeries.

Candytuft

Artemisia

BIG ONE-HALF PRICE SPECIAL

Any twenty rock plants listed in this catalog. Regular value \$3.00. One-half price, your choice, \$1.50.

cellent for border culture. To avoid wilting after cutting put stems in warm water.

GYPSOPHILA—Graceful border and rock plants with small flowers on light stems. Greatly prized for cutting. Do not disturb after once established.

Repens—Dwarf white Baby's Breath. Splendid in rockeries. 20c ea.

HELIANTHEMUM Mutabile (Rock Rose)—Low growing evergreen plants forming large clumps, completely covered with bloom during July and Aug. Pale rose changing to lilac, then to white. 8-12 in. Excellent for rockeries.

IBERIS (Perennial Candytuft)—Dwarf evergreen plants, 6 to 10 in. Covered with blooms in spring and early summer. Excellent for rockeries or borders where bright dwarf masses are wanted.

LYCHNIS—A fine old-fashioned flower, bearing large heads of brilliantly colored flowers, that live up the border during Summer and early Autumn.

Alpina—4 in. April. Close tufts olive green foliage. Clusters of rose-colored flowers.

Sweet Alyssum

BELLIS PERENNIS FL. PL. English Daisy—A low-growing spring-flowering semi-hardy perennial. Loves a shady place and will bloom for years if protected over the winters. Best mixed plants.

DIANTHUS Best Rock Garden Varieties—Rock gardens now so popular need these low growing dianthus to brighten spots and fill in crevices with their attractive flowers.

Dianthus Caesius (Cliff Pink)—1 ft. Flowers delicate rose pink, fragrant.

Dianthus Deltoides (Maiden Pink)—8 in. Delicate pink blossom carried above fine, feathery foliage.

GLOBULARIA (Globe Daisy)—Shrubby plants for the hardy garden or rockery, producing fluffy balls of blue flowers during the summer. They all require light soil in a warm, sunny position.

GEUM—Geums belong to the Rose family. The species described are showy, free-flowering kinds producing a wealth of attractive flowers which are much prized for cutting. They are of a tufted habit of growth with pinnate leaves. Ex-

MYOSOTIS (Forget-Me-Not)—4 to 9 in. Lovely dwarf plant for damp places, spreading rapidly and covering the ground. Makes excellent edgings and carpetings for beds or borders of perennial plants.

Alpestris Blue—Trailing habit.

Rosea—Pink.

Messidor—Large indigo blue flowers on long stems which makes it a good cut-flower variety.

NEPETA—Neat bushes of small lavender-like foliage covered with terminal spikes of lavender-blue flowers, both foliage and flowers aromatic. For beds, edging or rock garden.

SAPONARIA—6 in. A showy dwarf trailing plant, producing a sheet of vivid crimson flowers. June-Aug.

PACHYSANDRA (Japanese Spurge) *Terminalis*—A trailing plant 6 to 8 inches high, forming broad mats of bright glossy green foliage. A ground cover which will grow in all shady situations and the only plant which will thrive under pine trees.

PHLOX, *Subulata* (Moss or Mountain Pink)—An early Spring-flowering type with pretty moss-like, evergreen foliage, which, during the flowering season, in April and May, is hidden under the masses of bloom. An excellent plant for the rockery, the border, and invaluable for carpeting the ground.

SAXIFRAGA CORDIFOLIA (Rockfoil)—Useful for front of the border or rockeries, their 12 inch growth of broad green foliage being effective all the year; their dainty umbels of flowers breaking out very early in spring. Light pink.

SEDUM—Fine plants for rock gardens. A genus of plants with more or less fleshy leaves belonging to the Houseleek order. The species vary in habit from dwarf, creeping plants to those of larger growth, as the *Spectabile*, grows upwards of 2 ft. high. Some, too, are of evergreen and others of deciduous growth. The dwarf kinds do well as edgings to borders and the others are suitable for grouping in the mixed border. They are the easiest of all plants to grow.

3 in. An improved Acre. Very dark green foliage, bright yellow flowers produced in profusion during May and June.

Sieboldi—4 in. Round succulent, glaucous foliage; bright pink flowers in July and September. Grows slowly but is probably the most beautiful of all sedums.

Spurium—6 in. From the Caucasus, has pink flowers which appear in July and Aug.

Stoloniferum (*Coccineum*)—5 in. Very attractive trailing and semi-erect. Bronze-red foliage with purple-pink flowers during July and Aug.

Spectabile—18 in. One of the prettiest erect-growing species, with broad, light green foliage and immense heads of handsome showy rose-colored flowers.

Spectabile Brilliant—June-July. Same as *Spectabile* but flowers a vivid pink. 18 in.

TUNICA Saxifraga—A pretty tufted plant with light pink flowers, produced all summer. Useful either for the rockery or the border.

VERONICA (*Speedwell*) *Repens*—1 in. Useful carpeting plant. Blue flowers. May-June.

Rupestris—Dwarf and spreading. Deep blue flowers May-June.

VIOLA (*Tufted Pansy*)—Dwarf edging plant, hybrids of Alpine Violet and Garden Pansy, blooms 8 months if sheared often. Brilliant color spots in the rockery.

Sedum

Acre (*Golden Moss*)—3 in. This low tufted perennial spreads over the soil. The leaves are small, attractive, light green. The flowers, bright yellow in color, completely cover the plants and open in June and July.

Album—3 in. Thick waxy green foliage, white flowers in May-July.

Hispanicum—2 in. Mossy growth with grayish blue foliage, dense and prolific.

Lydiun—1 to 3 inch. The smallest Sedum; close groups of little round balls made up of the tiniest green beads, the color changing to purplish bronze; pinkish June flowers.

Muralis—5 in. Mossy foliage showing pink stems and turning reddish in fall. White flowers in June.

Rubrum—June-August. Brownish red foliage, light pink flowers. 18 in. Plants.

Sexangulare (*Hexagon Stone Crop*)—White flowers in June.

Veronica

Boston Ivy

Climbing Vines

BOSTON IVY (*Ampelopsis Veitchi*)—This is one of the finest hardy climbers for covering walls, verandas and trunks of trees, as it clings firmly to the smoothest surface, covering closely with overlapping foliage. The color is a fresh deep green in summer, changing to the brightest shades of crimson and scarlet in autumn. 2-year No. 1 plants, 40c each; or 3 for \$1.00.

DUTCHMAN'S PIPE (*Aristolochia Sipo*)—A magnificent native vine of climbing habit and rapid growth, with magnificent light green foliage 10 to 12 inches in diameter, and curious pipe shaped, yellowish brown flowers; grows well in shade. Grafted specimens, 1-year No. 1, 25c each.

CLEMATIS HENRYI—This is the finest white variety of all large flowering Clematis. A remarkable free and continuous bloomer. Flowers are large of beautiful creamy white with reddish chocolate anthers. 2-yr. 50c each.

CLEMATIS PANICULATA (Sweet Scented Japanese Clematis)—One of the most vigorous and beautiful of all climbers. A rapid grower, and desirable wherever a quick growing vine is needed on walls, verandas, etc. In late summer it produces dense sheets of medium sized, pure white flowers of the most pleasing fragrance. Will grow in almost any soil, and is entirely free from blight and insects. 2-year No. 1, 35c ea., or 3 for 90c.

HONEYSUCKLE, HALL'S JAPAN—A strong, vigorous vine, with pure white flowers changing to yellow. Foliage remains greens well into the winter. Extremely fragrant and covered with flowers almost the entire season. 2-yr. No. 1 vines, 25c each.

WISTERIA, CHINESE PURPLE—One of the most elegant and rapid growing of all climbing plants. Attains an immense size. Has long pendulous clusters of pale blue flowers in May and June, and in autumn. 2-year No. 1 plants, choice specimens from blooming wood, only 50c each; 3 for \$1.35.

Clematis Paniculata

CLEMATIS MME. ANDRE—Plant is a good grower and a very free bloomer. Color a distinct crimson-red. Entirely different from all other varieties. 2-year, 50c each.

CLEMATIS JACKMANI—Immense flowers of an intense violet-purple color that bloom continuously throughout the summer. 2-year, 50c each.

Wistaria

Hedges

The Beautiful Living Fences That Give Privacy to the Home

A small amount of money invested in beautiful hedges will add more value to a country or town home property, dollar for dollar, than any other similar investment without exception. A hedge planted about the borders of a

lawn will transform a heretofore bare looking spot into a place of beauty; and you can keep it low or let it go high as a screen.

BARBERRY Thunbergi (Japanese Barberry)—While very desirable as a shrub is also used for hedges, especially where a defensive hedge is required; grows thick and the sting of its thorns is not soon forgotten. Plant 12 to 20 inches apart. 12 to 15 in., Each 10c; Per 100, \$7.00.

PRIVET or LIGUSTRUM (Amur River Privet)—An upright, graceful grower; small leaves, which hang well; is perfectly hardy. 18 to 24 in., 75c per 100; \$5.00 per 100.

NOTE—We wish to call your attention to our Roses. Our Roses are all heavy, two-year, field grown stock. You can buy smaller size roses at less price but if you wish roses sure to bloom this season and to grow vigorously we recommend you to our hardy stock. See pages 11-14.

Strawberries

Strawberries are a fruit for all the people all the time, and no one can surpass us in the quality of plants. No matter where you live we guarantee our plants to reach you in perfect condition or we will promptly replace or refund the purchase price.

AROMA—Perfect flowering. A good commercial variety. Plants vigorous and healthy; make runners freely. Fruit mid-season till late, large bright crimson with light red flesh. Good quality. 75c per 100; \$2.50 per 500; \$3.50 per 1000.

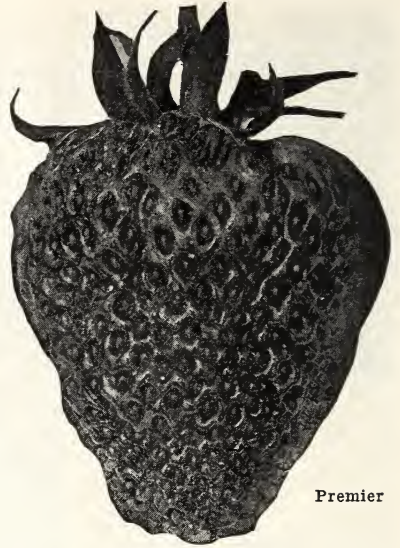

DR. BURRILL—The best thing anyone can say for Dr. Burrill is that it is superior to Dunlap; in fact, it really is an Improved Dunlap, which should be sufficient recommendation for you. 75c per 100; \$1.75 per 500; \$3.00 per 1000.

PREMIER—The greatest early Strawberry of all time. A big producer under all conditions, combining size, quality,

flavor and unusually attractive appearance with big yields. \$1.00 per 100; \$2.50 per 500; \$5.00 per 1000.

SENATOR DUNLAP —

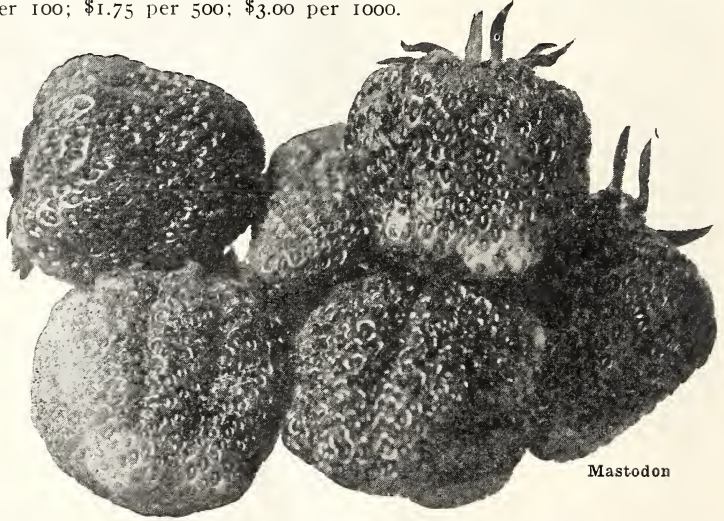

The grand old-time favorite that has made more dollars and more crates for Strawberry growers than any other variety. Especially desirable for canning. 75c per 100; \$1.75 per 500; \$3.00 per 1000.

Premier

Dunlap

Mastodon

Everbearing Strawberries

MASTODON—Order some of these guaranteed genuine Mastodon plants now and produce a year around crop of Strawberries. The plants you set in April and May, commence bearing in July and continue until Winter. **Three crops in eighteen months.**

Mastodon Plants, Big, Thrifty and Healthy—No ordinary Strawberry plant could mature the loads of fruit produced by this variety. Mastodon plants have enormous root systems.

Perfectly Hardy Everywhere. If your soil will produce garden truck, it will produce loads of Mastodon berries.

Mastodon is the first successful commercial everbearer. It is a gold mine to the foresighted grower. A four acre field of Mastodon in Michigan produced 1386 crates of fancy berries within 28 weeks after planting.

Prices of Mastodon: Postpaid, \$1.50 per 100; Express \$5.00 per 500; \$10.00 per 1000.

STRAWBERRY SPECIAL. SMALL GARDEN OFFER

50 Mastodon, 100 Dunlap; 150 Plants for \$1.00.

Our plants are Sand Grown. Note the root system. It pays to buy vigorous, healthy plants. More berries, better berries are the result.

Sand Grown Roots

RASPBERRIES

Will do well on any soil that will produce a good corn crop. Land should be thoroughly prepared and well enriched; ground bone is one of the best fertilizers. Keep well cultivated and free from weeds and suckers. As soon as they have done bearing cut out the old wood to give more vigor to the young canes for next year's fruiting. Inasmuch as raspberry appreciation varies radically according to individual tastes—some specially preferring the black ones which others dislike—it is well to provide all types in your family garden.

RED RASPBERRIES

LATHAM—This remarkable and very desirable new variety is certified absolutely **mosaic-free**, and acceptable anywhere. Latham is perfectly hardy. Withstanding Manitoba winters without protection. Its production is superlative, outyielding even Cuthbert. The berries are large and round, with profitable shipping firmness. The color is a richly brilliant red, an eye-catcher on market stands, a delightful table feature, and perfect canned exhibit.

COLUMBIAN—Fruit very large, purplish color, rather soft; rich sprightly flavor, unrivaled for canning etc., immense cropper.

Eldorado

CUTHBERT (Queen of the Market)—A remarkably strong, hardy variety; standing the northern winters and southern summers equal to any. Very large, conical berries, measuring three inches around, so firm they can be shipped hundreds of miles by rail in good condition; flavor is sweet, rich and luscious.

KING—Plant is a strong grower. Berry is firm, a good shipper; large size; beautiful bright scarlet color; ripens with the earliest.

BLACK RASPBERRIES

CUMBERLAND—Healthy, vigorous, throwing up stout, stocky, well branched canes that produce immense crops. Fruits very profitable; large, firm. Mid-season.

PLUM FARMER—The most profitable early market sorts; maturing the entire crop in a very short period. The berries are large, thick-meat-ed, firm, attractive.

BLACKBERRIES

PRICE OF BLACKBERRIES	By Mail	Exp. or Frt.
Blowers	100	1000
Eldorado	\$2.50	\$18.00
	2.50	18.00

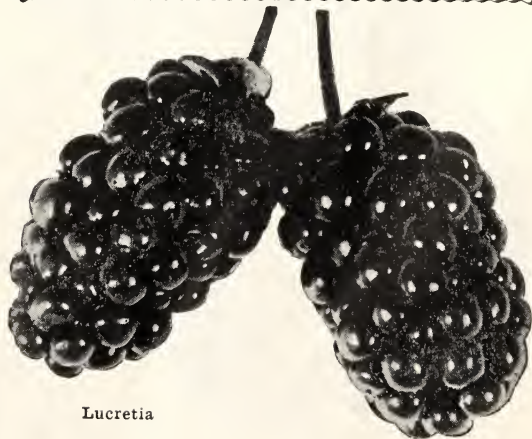

Should be planted in rows six to seven feet apart, three to five feet in the row. Keep the ground light and rich. Pinch the canes back when they have reached four feet in height. The following varieties are considered best.

BLOWERS—Claimed to be the hardiest and most productive and to bring on the market the highest price of all blackberries. Large size, jet black, good shipper, best quality; unexcelled productiveness.

ELDORADO—The vines are vigorous and hardy, enduring the winters of the far north-west without injury, their yield, enormous. Berries large, jet black, borne in large clusters, and ripens well together, they are very sweet, melting and pleasing to the taste; have no hard core, and keep eight or ten days after picking.

LUCRETIA DEWBERRY—Dwarf and spreading. The fruit, which ripens early, is often one and one-half inches long by one inch in diameter; soft sweet and luscious throughout. \$4.00 per 100, \$25.00 per 1000.

We have a few Chief, that New Red that is being so well recommended by the growers everywhere. "The only berry that excels the Latham," says one grower. With each 100 plants of any other raspberry or bush berry, we give free 6 Chief to try out.

Lucretia

Cherries

Cherries succeed best in sandy or gravelly soil, but it must be well drained. The Sweet varieties grow more rapidly, and make more pyramidal trees. Sour varieties are more dwarf and can be planted about 18 feet apart in permanent orchards. Sweet Cherries should be planted about 24 feet apart. The roots and tops of Cherry trees should be severely pruned when planted to secure best results.

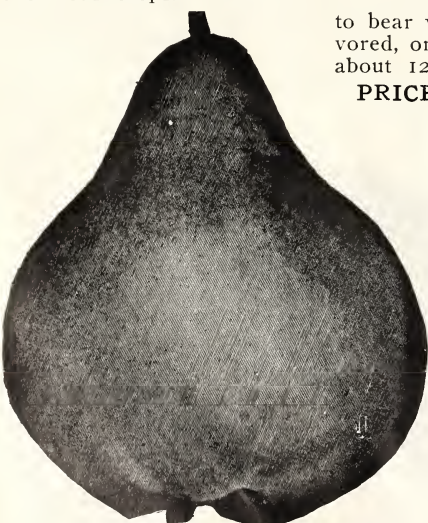

EARLY RICHMOND (Sour)—This is the earliest and best sour variety, and a well known standard sort. Tree is hardy, vigorous and an upright grower. Is very productive and regular in bearing. Fruit a clear bright red, of medium size, acid, rich, and one of the best for canning and pies.

MONTMORENCY (Sour)—The finest sour Cherry grown. Is large, juicy, very bright red, acid. There is greater demand for this Cherry on the market than any other. The trees are the cleanest and best growers and are less subject to disease, wet weather and rot than any other sour variety. Ripens about a week later than Richmond.

BING (Sweet)—Tree hardy and a strong grower, especially adapted to the East, although it came from Oregon. Fruit extra large, black, very fine and excellent for commercial purposes.

BLACK TARTARIAN (Sweet)—Tree a vigorous, upright grower and immense bearer. Fruit very large, purplish black, heart-shaped; flesh mild and sweet, and quality considered of the best for market and dessert.

NAPOLEON (Royal Ann) (Sweet)—Of fine appearance and very largest size. Color yellow and amber, with bright red blush; flesh firm, juicy and delicious. Profitable for market, finding a ready sale for canning and dessert. Bears enormous crops.

Orange Quince

to bear very young and produce big crops. Fruit is excellently flavored, orange shape and of large size. Tree a dwarf grower, planted about 12 feet apart in orchards.

PRICE: 5-7 ft., extra heavy \$1.00 each; \$9.00 per 10.

APRICOT

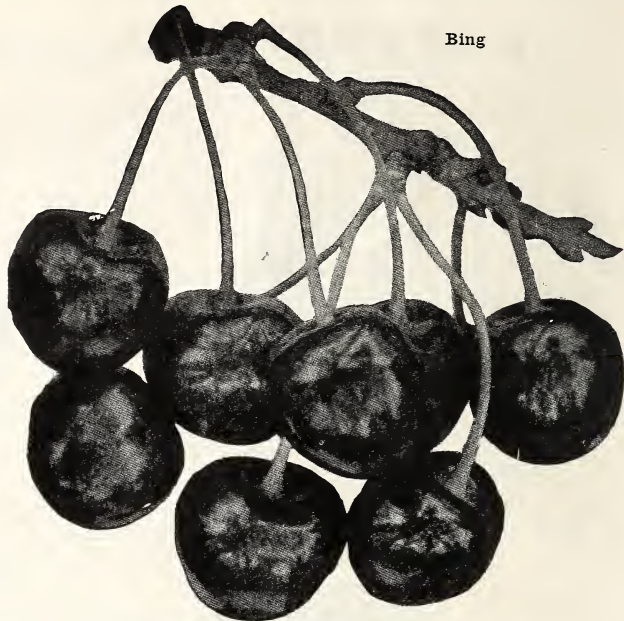

MOORPARK—Very large, orange-yellow fruit with red cheek; flesh yellow, sweet, juicy and delicious; freestone; very productive; extra good for either market or dessert. Will thrive and produce an abundance of fruit anywhere that a peach or plum will thrive.

PRICE—4 to 5 ft. trees, 75c each; \$6.00 per 10.

Bing

SCHMIDT'S BIGARREAU (Sweet)—New. Remarkably hardy and productive. Fruit of largest size, a deep mahogany color; flesh dark, tender, juicy, very rich, excellent flavor. Stone small and separates easily from flesh.

WINDSOR (Sweet)—New seedling originated at Windsor, Canada. Fruit large, liver colored, quite distinct; flesh remarkably firm and of fine quality. Tree hardy and very prolific. Most valuable late variety for market or family.

CHERRY PRICES:

5 to 7 ft. trees: 70c each; \$6.00 per 10;
\$50.00 per 100.

4-5 ft. 40c each; \$3.50 per 10; \$25.00 per 100.

QUINCE

ORANGE—We list only this one Quince, as we consider it the best by far. The trees commence to bear very young and produce big crops. Fruit is excellently flavored, orange shape and of large size. Tree a dwarf grower, planted about 12 feet apart in orchards.

Moorpark

Agawam

compact, slightly shouldered; color delicate greenish-white with yellow tinge when ripe, berries tender juicy and nearly transparent, sweet rich; ripens about two weeks before Concord.

BLACK VARIETIES

CAMPBELL'S EARLY—New. Good shipper. Ripens very early, but remains sound on vines for many weeks. This makes it one of the most satisfactory and profitable market sorts to grow.

CONCORD—One of the most popular and reliable varieties we possess; bunch large, compact and shouldered; berry large, round almost black with blue blooms, juicy, buttery and very sweet. 10c each.

MOORE'S EARLY—A large Grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield; very valuable as an early Grape.

WORDEN—Seedling of the Concord which it greatly resembles in appearance and flavor, but the berries are larger. The fruit is said to be better flavored and to ripen several days earlier. These qualities will give it the foremost rank among native grapes.

Grapes require little care after they are once in bearing.

Grapes

There is scarcely a yard so small in country or city where from one to a dozen grape vines cannot be grown. Grapes can be put to a variety of uses and not only are they more useful than most other fruits, but they thrive well on most any soil in any locality; on hillsides, in valleys, on rich or poor land. In vineyard rows set vines 6 to 8 feet apart with 8 feet between the rows, requiring 910 plants for an acre. Despite the scarcity of grape vines we are making special prices for quality stock. Each 15c; per doz., \$1.20; per 100, \$8.00.

RED VARIETIES

AGAWAM—Bunch large shouldered; berry large, reddish brown, tender, vinous and of excellent flavor. Very vigorous and productive and one of the best of its class.

DELEWARE—The bunches are small, compact, and sometimes shouldered; berries are small with thin but firm skin; flesh juicy, very sweet and refreshing and of the best quality for both table use and for wine. Ripens with Concord or a little before; vine is hardy, productive and a moderate grower.

SALEM—Bunch large and compact; berry large, of a light chestnut or Catawba color, thick skin, perfectly free from hard pulp; very sweet and sprightly with a most exquisite aromatic flavor; as early as Wordens; keeps well.

WHITE VARIETIES

NIAGARA—Occupies the same position among the white varieties as Concord among the black. Bunch and berries large, greenish white, changing to pale yellow when fully ripe. Skin thin but tough; quality much like the Concord. 10c each.

MOORE'S DIAMOND (White)—A vigorous grower, entirely free from mildew and a prolific bearer; bunches large and

Delicious Peaches

This choice fruit will thrive well on heavy clay or coarse sandy soil or thin land where other crops are almost a failure. Easily grown and will bear in two or three years. Care should be exercised in selecting mid-season and late varieties as well as enough of earlier varieties to provide your home with this excellent fruit throughout the season. Peach trees make a splendid filler in planting an ample orchard. We here list only the very best varieties and at low prices for best stock that can be grown.

Peach trees should be planted 16 feet apart each way and require 170 trees to the acre.

EARLY AND MID SEASON VARIETIES

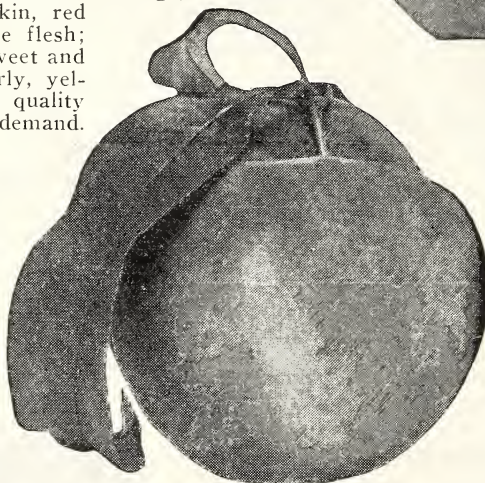

CARMAN—In this new, hardy, rot-proof Peach, almost as large and fine as the Elberta itself, we have a Peach of great market value; a large, roundish Peach with pale yellow skin, red blush on sunny side; white flesh; tender and melting; rich, sweet and superior flavor. A big, early, yellow-skinned Peach of high quality is sure to be in great demand. August.

CHAMPION (Free) — Large, round quite regular; yellowish-white, mottled with red on sunny side; flesh white with red at the pit; one of the best in quality. For near-by market and home use it is the best variety we know of. A good healthy grower and hardy in fruit bud. Fruit ripens from 20th of August to first of Sept.

CRAWFORD'S EARLY (Free)—Large, roundish,

Champion

bright yellow with red cheek; flesh yellow, juicy and sweet; quality good. August and September.

ELBERTA—The standard market peach of the country. Very large, red blush; flesh yellow, tender, and juicy. Rank, vigorous grower. Freestone. Ripens middle of September.

ROCHESTER — First large yellow freestone peach to ripen. Fruit sweet, juicy, and of delicious flavor. Excellent market or home use variety.

SOUTH HAVEN—New and very popular. Has all the good qualities of Elberta but ripens two weeks earlier. Very similar to Elberta in every way.

J. H. HALE—Fruit extra large. Ripens about a week earlier than Elberta and averages a third larger in size. Color beautiful golden yellow with deep carmine blush. Flavor is extra fine.

LATE RIPENING

CRAWFORD'S LATE (Free)—Large, roundish oval, yellow with broad red cheeks, flesh yellow with red at the pit; melting, vinous and very good. Late September.

GOLD DROP (Free)—The almost translucent golden colored flesh of this Peach renders it exceedingly attractive in market, where it sells at highest prices. The tree is hardy and bears early; profitable. Late September.

HEATH CLING—Very large, flesh white, juicy and melting. Good keeper and shipper. Ripens in October.

SALWAY (Free)—Large roundish, deep yellow with rich red cheek; flesh yellow, firm and juicy; sugary; a valuable late market sort. First of October.

South Haven

PRICES OF PEACHES

Pears a Profitable Fruit

Bartlett

KIEFFER'S HYBRID—Originated near Philadelphia. Supposed to be a seedling of a Chinese Sand Pear crossed with the Bartlett. Size large, very handsome; skin yellow with a bright vermilion cheek; very juicy, with a musky aroma; quality good when ripened to perfection. Rather coarse grained, but one of the best Pears for canning or preserving. As near blight proof as a Pear can be called.

RHUBARB

Leaf stalks long, large, tender, juicy, produced quite early. Cellar-grown rhubarb with beautiful pink, tender stalks may be enjoyed in March by anyone who will devote a little time to it. In the fall a number of roots are packed together with rich soil in some cool, dark cellar. After the crop has been cut, the roots are replanted in the garden to regain their vigor for the next year's forcing. Price, 5 for 65c, 10 for 66c.

ASPARAGUS PLANTS

AT LOW PRICES

Price, 25 for \$1.00; 100 for \$2.00; 1,000 for \$10.00. Prepaid.

It is not necessary to tell the good qualities of the Asparagus, as it is known to everybody. Dig up the ground deep, put on plenty of well-rotted manure, thoroughly mixed in the soil, throw out a bed about four to five inches deep, lay the plants in by spreading the roots out well, and scatter the dirt over the plants about four inches, or the depth of the ground thrown out, press the dirt well around the plant by patting it down with a spade or shovel. Keep the crown of the Asparagus cut regularly so it will not get too large and woody.

WASHINGTON—A new rust resistant pedigree Asparagus. As a standard variety for the production of fancy Asparagus for the home or market, it stands ahead of all others in size, vigor, tenderness and quality.

The Pear Tree does well in almost any good soil, but thrives best in rather heavy clay or loam. They make a good market crop in almost all sections. It grows erect and may be planted closer than the apple. Do not encourage a rapid growth as this favors blight. Standard pear trees should be planted 18 feet apart each way, requiring 135 trees to the acre.

Big Profits are Realized from Pear Orchards. Our Trees Produce First Grade Fruit

Price of Pear Trees	Each	10	100

Select 4 to 6 ft.50	4.00	30.00

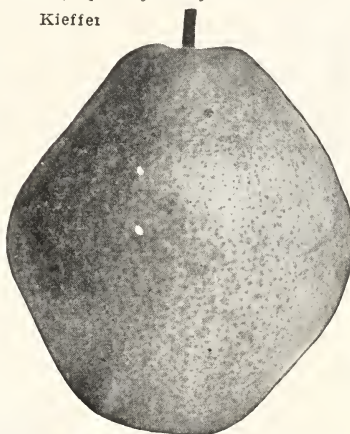

EARLY VARIETIES

BARTLETT—Large size, with beautiful blush next to the sun; buttery, very juicy and high flavored; tree a strong grower and a young and abundant bearer. August and September.

CLAPP'S FAVORITE—Large ovate; skin thin, pale yellow, marked with crimson and fawn colored dots, flesh white, fine grained, juicy, sweet, vigorous, upright, buttery, rich and melting, very vigorous, upright grower. September. Very desirable in all sections.

SECKEL (Old Fashioned Sugar Pear)—Our most highly flavored Pear. Fruit small, yellowish brown, with a russet-red cheek; flesh very juicy, melting, aromatic, with a rich spicy flavor; quality very best.

Kieffer

FLEMISH BEAUTY—One of the best varieties of pears on account of its hardness. The tree is a strong grower, an annual and abundant bearer, and is usually successful over a large range of country. The fruit is large; the skin pale yellow; the flavor is sweet and melting. Ripens in Sept. and Oct.

DUCHESS D' ANGOULEME

—A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

Clapp's Favorite

Apples—King of Fruit

We like to sell you Apple trees because they will make you money. Apples succeed everywhere and the average returns from a well kept orchard are greater than from any other crop.

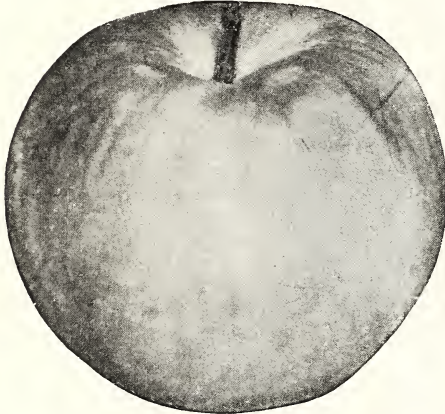

It is an alarming fact that the planting of Apple trees during the past ten years has decreased, while the population and consumption of fruit has been increasing. Nearly every farmer has a piece of ground that he can give over to an Apple orchard. While the trees are small he can grow between them cultivated crops, and in a few years he will have a fine orchard from which many dollars of profit can be gathered.

We strongly advise every landowner to set an Apple orchard each year, to keep pace with the increase in demand and population.

Grown in Your Own Orchard They Sun Ripen to their Highest Perfection on the Trees.

SUMMER APPLES

DUCHESS OF OLDENBURG—The old time favorite. Round, beautiful streak of red and yellow. Early.

Yellow Transparent

EARLY HARVEST—Size, medium, shape roundish, usually more or less oblate, smooth, bright straw color when ripe; flesh nearly white; flavor rather acid; fine. Season, July. Productive. Needs rich cultivation to be fine. Good throughout the North and Southwest.

RED ASTRACHAN—Earliest and best red apple. Good size, dark red. Vigorous, hardy and productive.

YELLOW TRANSPARENT—Fruit a clear yellowish-white. Begins to ripen in July. Especially hardy.

AN APPLE TREE

Planted this year will be bearing delicious fruit in a very short time, and each year the productiveness of the tree increases.

FALL APPLES

MAIDEN BLUSH—Old favorite. Strictly fall apple. Medium size, smooth, beautifully blushed with red on creamy yellow.

WEALTHY—Hardy, thrifty and good bearer. Fruit medium, roundish, smooth, mostly covered with dark red; flesh white, fine grained, juicy; sub-acid; good quality, January. For market, desserts and cooking.

We Sell 5 at 10 rate; 50 at 100 rate; 500 at 1,000 rate.

See bottom of page 29 for Premium.

Delicious

WINTER APPLES

BALDWIN—Popular in north. Bright red, medium to large, firm, finest quality.

DELICIOUS—Grand champion of apples. Red with pin dots of yellow. Fine grain, crisp, juicy, sweet. Good keeper.

JONATHAN—Old reliable. Brilliant red, rich, fine acid flavor, hardy. Good market sort.

GRIMES GOLDEN—Large yellow, high quality, very rich subacid pear flavor.

McINTOSH RED—Large deep crimson. Flesh white and tender. Tree hardy and vigorous.

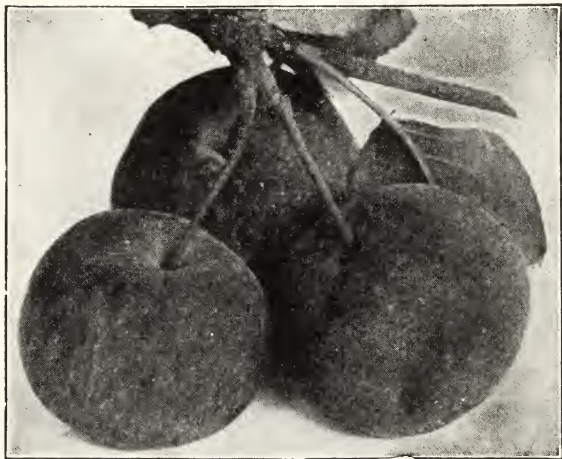

NORTHERN SPY—Large, pale yellow skin mottled with carmine. Firm, tender, crisp, juicy, sub-acid. Popular everywhere.

RAMBO—Medium, flat streaked red and yellow; very tender, juicy and fine flavored. Tree an upright grower, hardy and productive. October to December.

RHODE ISLAND GREENING—Season, December to March. Fruit large and handsome smooth, dark green overspread with yellow. Flesh tender, rich, rather acid, but highly flavored and excellent.

ROME BEAUTY—Large, roundish, very slightly conical; mostly covered with bright red on pale yellow ground; flesh tender, not fine grained, juicy, of good quality. Ripens early in winter.

Save two years. We have some extra heavy plum and apple trees 6-8 ft. bearing size. These cannot be shipped by mail. Rather expensive by express but for our cash and carry customers. Here is a Bargain. See page 28 for price offer.

Hyslop Crab Apples

STAYMAN'S WINESAP—Most profitable market variety. It has large size, bright red color, great productiveness and best quality to commend it. The tree is a vigorous grower, is irregular and drooping in habit, and adapts itself readily to different soils and situations. Drought resisting. Season, November to February.

WINTER BANANA—An excellent variety, which has stood the severest tests. Tree is hardy and will succeed in very cold climates, its wonderful productiveness will bring quicker and larger returns than any other Apple in the orchard.

CRAB APPLES

Prices of all varieties same as standard apples.

For preserves, jelly, flavoring, canning, Crab Apples are very good. Also their tartness is agreeable once in a while when they are eaten fresh. The trees themselves are beautiful and when loaded with the bright colored fruit, are striking. They are an ornament to any grounds and look well beside the finest ornamentals.

TRANSCENDENT—The largest Crab Apple. Red; showy; excellent. September to October.

YELLOW SIBERIAN—Beautiful glossy yellow, shaded bright red; good size, clear, tart. October.

SPECIAL PREMIUM FOR APPLE ORDERS

For every order for 10 "extra heavy" apple trees as listed above, we will give free if you ask it, one Mountain Ash ornamental shade tree. Do not miss this chance to get this most brilliant ornamental tree. See description on page three.

Plums and Poultry Do Well Together

The Plum is essentially a fruit for the home orchard, and home use. The trees require less space than Apples. When planted, they should be cut back severely and pruned the first two or three years; after that, they require little attention. They do best in well drained clay soil. There is a good demand for the fruit commercially for evaporating and canning. For home use, any of those described here are suitable.

PRICES OF PLUM TREES

	Each	10	100
Plums (all varieties listed), 2-year, 9-16 inch, 5 to 6 ft.	\$0.50	\$4.50	\$42.50
Plums (all varieties listed), 3-year Super-Size75	7.00	65.00

BRADSHAW—A splendid early. Large, dark violet red. Flesh yellow, juicy, good. Fine for canning.

BURBANK—Fruit large, oval, with reddish purple skin. Heavy yielder and very hardy. Good flavor; more acid than the Bradshaw.

GERMAN PRUNE—Medium sized, long; purple; flesh green, sweet; freestone; excellent quality.

LOMBARD—Medium size; somewhat oval in shape; violet red; juicy, pleasant and good. Very hardy. One of the very best varieties to plant. Do not fail to include some of these in your order. August.

Burbank Plum

YELLOW EGG—Very large; oval; deep golden; a showy market Plum; excellent for canning.

Currants

Fine for Jelly—Easy to Grow—Very Productive

CHERRY—The Standard Red Currant. Fruit very large; a fine upright grower; valuable for market and garden; splendid quality. 15c each; \$1.00 per 10.

FAY'S PROLIFIC—One of the best and most popular red Currants. It is productive, hardy and vigorous; it will average larger than Cherry; of the finest quality, and brings best prices on the market; fruit bunches 3 to 5 inches long, easily picked. 15c each; \$1.00 per 10.

PERFECTION—Cross of Fay's Prolific with White Grape and combines the best qualities of both parents. In color it is beautiful bright red and of a size larger than the Fay; the clusters average longer and the size of the berries is maintained to the end of the bunch. It is one of the most productive Currants we have ever known. 15c each; \$1.00 per 10.

Downing

Gooseberries

Fine for Pies—Easy to Grow—Very Productive

DOWNING—Medium to large, pale green. Quality good. Upright productive bush. Midseason. The most widely grown variety.

HOUGHTON—Small, dull reddish brown fruit, tender, juicy, sweet, and pleasant, ripening soon after mid-summer. Profuse bearer.

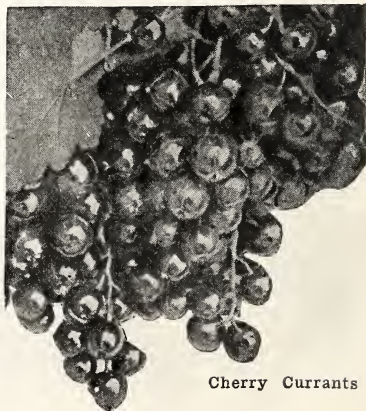

PRICES OF GOOSEBERRIES

2-year, extra fine, 25c each; \$2.00 per 10.

Cherry Currants

UNUSUAL SHRUBS

THE NEW BEAUTY BUSH, KOLKWITZIA AMABILIS

A charming new shrub which increases our debt to China. Discovered among the high peaks of Hupeh's mountains, its progeny in America is proving likewise hardy in New England's severe climate. The attractively leaved bush attains about six feet, the center upright, the outer branches gracefully arching. Has a general resemblance to both Weigela and Honeysuckle, the beautiful trumpet shaped flowers appearing in great profusion during June, in pairs which clusters closely into cymes of about twenty-five. Flowers are bell-shaped and somewhat lipped, pale pink with orange veins in the throat, the buds being much darker. Price 2-3 ft. 75c.

Kolkwitzia Amabilis

FLOWERING CRABS (MALUS)

Rounded, compact, small trees, largely used in lawn groups and high shrub borders, for their profuse early bloom; their dense, glossy, handsome foliage which colors richly; and their ornamental fruits. 3 to 4 ft. \$1.00 each.

SPECTABILIS—Narrow foliage glossy above, glabrous beneath, the tree small. Coral red buds expand into pretty rose colored flowers.

BECHTEL'S—The only genuine double flowered crab. Makes a medium sized tree; perfectly hardy, succeeds well in most soils. When in bloom appears to be covered with delicate pink, perfectly double small roses of delicious fragrance.

FLORIBUNDA PURPUREA—A beautiful form of above with darker red flowers.

NIEDZWETZKYANA—Purplish foliage, the wood and bark also tinged with red. Extra large flowers deep pink.

COTONEASTER

COTONEASTER HORIZONTALIS (Rock Cotoneaster)—A very low growing shrub with almost horizontal branches and small very dark green leaves. Small pinkish flowers in June followed by bright red oval-shaped berries. On account of its habit, is much appreciated in rockeries, the front of borders, or to overhang garden walls, to display its crimsoning leaves and scarlet fruits, deep into winter. Price, 10-12 in. 50c each.

Beauty Bush

MAGNOLIA

GLAUCA (Sweet Bay)—When planted in moist soil this makes a handsome tree 30 to 40 feet high, but in the drier lawns is much smaller. Its broad leaves are glossy, laurel-like, almost evergreen. In June its large, waxy white flower-cups are lovely and exquisitely fragrant. 2 to 3 feet, \$3.00; 3 to 4 feet, \$4.00.

SOULANGEANA—One of the hardiest and finest. Its blossoms are from 3 to 5 inches across, cup-shaped, white and rosy violet, opening before its leaves which are massive and glossy. 2 to 3 feet, \$8.00; 3 to 4 feet \$12.00.

PRUNUS (PURPLE LEAVED PLUM)

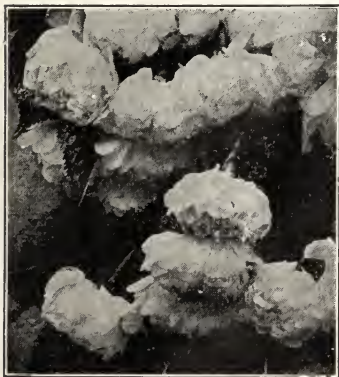

PISSARDI (The original Purple-leaved Plum)—Showy pinkish purple leaves that deepen in color to the end of the season. A small round topped tree, with white, single flowers in spring. 3-4 ft., 50c.

TRILOBA (Double Flowered Plum)

—Very early in spring, before its leaves appear, the small tree is decked in a fleecy cloud of very double light pink blossoms. 2-3ft., 60c.

Magnolia Soulangeana

Flowering Crab

FLOWERING CHERRIES

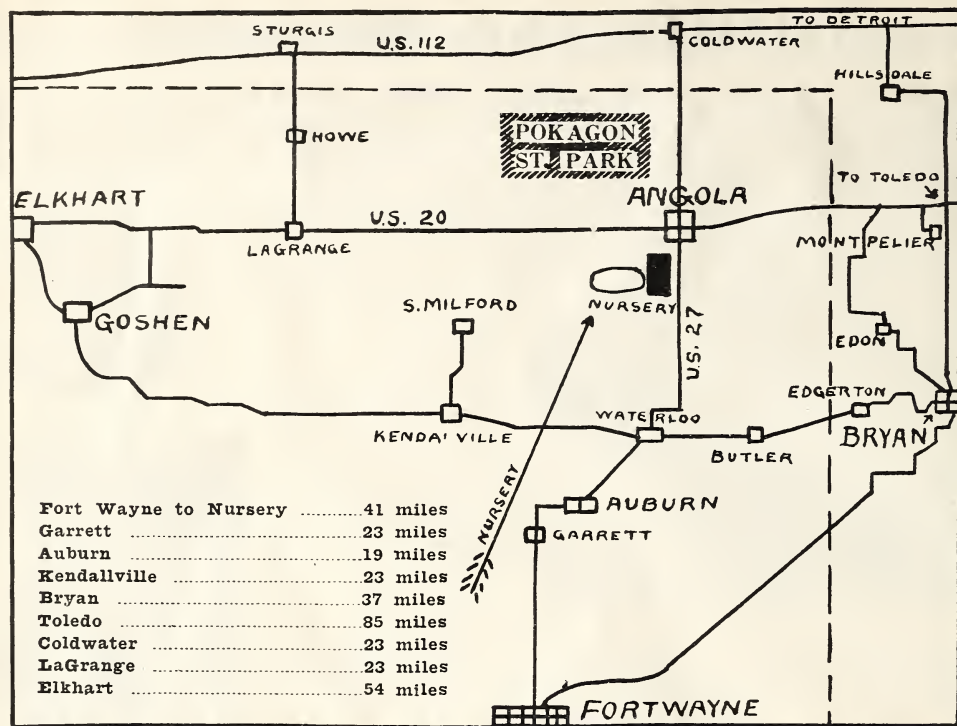

A recently developed line of small sized flowering trees which is taking America by storm.

JAPAN WEeping (C. Subhirtella Pendula)—The "Rosebud Cherry". Longest known of this wonderful family in American landscapes; popularized by its adaptability to small lawns where its swaying wands, so thickly studded with light pink bloom, are an outstanding incident of spring. Grafted on 5 to 6 foot stems. 1 year heads \$4.00 each; 2 year heads, \$4.75.

1 Beauty Bush, 2-3 ft.	\$0.75
1 Flowering Crab, 3-4 ft.	1.00
1 Prunus Triloba, 2-3 ft.	.60

"Visitors are always welcome at our Nursery and we enjoy having you call any time, even though you have no intention of buying. Our men will be pleased to show you the grounds, answer any question and help you solve your planting problem. We consider it a privilege to show you our grounds; to have you as our guests. Come visit us."

BARGAIN OF A LIFETIME!

Shade Tree Special; Trees Fresh Dug. No Dried Out Stock.

Set your home grounds. Set that lake lot, or Subdivision!

Never a Chance Like This Again.

Ash Leaf Maple, 5-7 ft.	Each 30c; per 100	\$25.00
Silver Maple, 5-7 ft.	Each 45c; per 100	35.00
Lombardy Poplars, 5-7 ft.	Each 35c; per 100	25.00

These trees are fine, straight trees growing here in our nursery. Each will be dug for you the day you want them. Plenty of fibrous roots. **Sure to grow.** Why waste two or three years with dried out stock that stands still for a time and finally peters out? Drive in and see these trees in the nursery row, a fine block that we are proud to show to all our customers.

See page three for Chinese Elm and other shade trees.
